# TABLE OF CONTENTS

The Emerging Formalization of MOOC Coursework: Rise of the MicroMasters ........................................................................................................................................ 1
Jason Caudill, King University, United States

Social, Nonacademic Interaction in the Online Learning Environment ........................................ 7
Audrey Heron, Texas Tech University, United States; Lesley Casarez, Angelo State University, United States

Integrating a BYOD Program in High School English: Advantage or Distraction? ........................................ 12
Robin Kay & Derrick Schellenberg, UOIT, Canada

3D Digital Training of a High-Risk Environment: A Case Study of an Industry-Academia Partnership for Improved Learning ................................................................................. 17
Jon Preston, Jeff Chastine & Rongkai Guo, Kennesaw State University, United States

Do Math Apps Help Elementary School Students? It Depends .................................................. 27
Robin Kay & Jasmin Kwak, UOIT, Canada

Fast Language Learning: Being Able to Manage Projects in a Foreign Language within Two Month ........................................................................................................................................ 33
Stefan Thalmann, Graz University of Technology and Know-Center GmbH, Austria; Jorge Larrazábal, Magna Int., Mexico; Viktoria Pammer-Schindler, Graz University of Technology and Know-Center GmbH, Austria; Armin Kreuzthaler, Magna Int., Austria; Angela Fessl, Know-Center GmbH, Austria

The Role of Educational Media and Technology in Developing Countries (R.E.M.O.T.E) ........................................................................................................................................ 38
Dibo Bashuna, Oris Griffin & Sevinj Iskandarova, James Madison University, United States

Developing Preservice Mathematics Teachers’ Post-Teaching Reflection Through Online Video ........................................................................................................................................ 43
Wilfred W.F. Lau & Yip Cheung Chan, The Chinese University of Hong Kong, China

Creating a Codebook for Ascertaining South African and Finnish Mathematics Teachers’ WSTP to Cultivate Technology Intense Professional Development ........................................................................................................................................ 47
Verona Leendertz & Seugnet Blignaut, North-West University, South Africa

Hazard Warnings on Hazard Perception in a Game-Based Multi-Player Simulation ........................................................................................................................................ 56
Abdurrahman Arslanyilmaz & Joseph Korchnak, Youngstown State University, United States
Learning Analytics in a Blended Learning Context ................................................................. 62
Mike Carbonaro & Amanda Montgomery, University of Alberta, Canada; Amin Mousavi, University of Saskatchewan, Canada; Bill Dunn & Denyse Hayward, University of Alberta, Canada

Development communicative competence using iPad, cooperative learning and teaching thinking ................................................................. 67
Sonia Lara, Universidad de Navarra, Spain; Alvaro Gonzalez, Irabia-Izaga School, Spain; Sara Ibarrola, Universidad de Navarra, Spain

Using Peer Reviews in MOOCs ......................................................................................... 74
Xueyun Qian, Competence Center E-Commerce (CCEC), Germany; Peter Weber, Fachhochschule Südwestfalen, Germany; Klaus Wölfel, Nexedi GmbH, Germany

Mobile Technologies for Project Based Learning: A Portrayal of the Process and its Effects on Teaching, Attitudes and Educational Beliefs ................................................. 84
Anat Shayovits & Merav Asaf, Kaye Academic College of Education, Israel

Application Scenarios of Mobile Learning in Vocational Training: A Case Study of Ach So! in the Construction Sector ................................................................................ 89
Marjo Virnes, Aalto University, School of Arts Design and Architecture, Department of Media, Finland; Janna Thiele & Markus Manhart, University of Innsbruck, School of Management, Information Systems, Austria; Stefan Thalmann, Know-Center and Graz University of Technology, Institute of Interactive Systems and Data Science, Austria

Digital Media User Experience Research and Strategy for Parents with Poor Literacy Skills of Pre-School Children from Disadvantaged Communities .................................. 99
Rhodora Abadia, Torrens University Australia, Australia

Mobile Technology and its Use among Media Students at Zayed University in Dubai ................................................................................................................................. 109
Najat AlSaied & Fokiya Akhtar, Zayed University, United Arab Emirates

Close Educational Gap by Cheating? Comparing Faculty, Majority and Minority Students' Perceptions of Academic Dishonesty ................................................................. 118
Ina Blau, Yoram Eshet-Alkalai & Adi Friedman, The Open University of Israel, Israel

Hybrid Course Development: Enhancing Global Competencies via ICT ....................... 123
Teresa Chen Chen, California State University, Long Beach, United States

Examining Developing Digital Competence in Teachers and Students Over Time: A Mixed Method Case Study of a School That Has Undertaken a Technological Shift in Its Educational Environment ............................................ 128
Michel Leger & Viktor Freiman, Université de Moncton, Canada
How I Learned to Connect with My Students While I Tried to Connect My Students to the Online Classroom ................................................................. 133
David Rago, National University, United States

Engagement Enhances Well-Being in Simulation-Based Healthcare Education ........................................................................................................ 138
Heli Ruokamo & Tuulikki Keskitalo, University of Lapland, Finland

Lessons from (almost) 25 years of hybrid and online physics courses at Michigan State University ........................................................................................... 148
Gerd Kortemeyer, Michigan State University, United States

Papert’s Legacy: Logo, Legos, and Playful Learning ........................................ 153
Jason Powell, The University of North Texas, United States

Exploring Relationships Between Peer Review, Revision Strategies, and Self-Efficacy in Online College Composition: Preliminary Analysis .................................................. 158
Audrey Antee, University of Florida, United States

Exploring the Embodied Effect of AR-based Science Exploration ......................... 164
Ming-Puu Chen & Szu-Ju Lin, National Taiwan Normal University, Taiwan

Using Google Docs to support collaborative learning among non-native english speaking students. ....................................................................................... 168
Nafisa Mahmood, University of North Texas, United States

Is anyone watching the course video? Inferring elapsed watch time and video engagement patterns when using embedded videos from YouTube, Vimeo, or other third-party video streaming services for Moodle and other online learning management systems .......................................................................................... 172
Jeremy Riel & Kimberly A. Lawless, University of Illinois at Chicago, United States; Scott W. Brown, University of Connecticut, United States

A Sentence Generation Support System for Learners of Japanese .......................... 179
Asuka Terai, Future University Hakodate, Japan; Yutaro Shiramizu, Tokyo Institute of Technology, Japan; Wanying Wang, Tsinghua University, China; Masanori Nakagawa, Otsuma Women’s University, Japan

Examining pre-service teachers’ media literacy level with some variables .............. 187
Hatice Yildiz Durak, Fatma Gizem Karaoglan Yilmaz & Ramazan Yilmaz, Bartin University, Turkey; H. Tugba Ozturk, Ankara University, Turkey
Student Moderators in Asynchronous Online Discussion: Scaffolding Their Questions ........................................................................................................................... 198
Daniel Zingaro, University of Toronto Mississauga, Canada; Alexandra Makos, Sadia Sharmin, Lindsay Wang & Antoine Despres-Bedward, OISE - University of Toronto, Canada; Murat Oztok, Lancaster University, United Kingdom

Examining opinions of pre-service teachers about the use of educational Infographics ................................................................................................................................ 203
Fatma Gizem Karaoglan Yilmaz, Ramazan Yilmaz & Hatice Yildiz Durak, Bartin University, Turkey; H. Tugba Ozturk, Ankara University, Turkey

Authentic Scenario-Based Learning through a Serious Game – Digital Simulation of Real Work Situations for the Education of Health Care Professions ................................................... 211
Rasmus Pechuel, Ingenious Knowledge GmbH, Germany; Nadin Düthorn, University of Applied Science in Münster, Germany

Human-centered design in promoting students’ digital mental health literacy ............................................................................................................................. 217
Rebekah Rousi & Marja Kankaanranta, Faculty of Information Technology, University of Jyväskylä, Finland; Eloho Ifinedo, University of Jyväskylä, Finland

Are you ready? Assessing Digital Competencies for Online Learning via the General Technology Confidence and Use (GTCU) Instrument ............................................................................................................................. 221
Maurice DiGiuseppe, University of Ontario Institute of Technology (UOIT), Canada; Roland vanOostveen, UOIT, Canada; Elizabeth Childs, Royal Roads University, Canada; Todd Blayone & Wendy Barber, UOIT, Canada

An Analysis of a Technology Supported Learning Environment (TSLE): EdHeads ............................................................................................................................. 227
Helen Fake, Janet Athanasiou & Nada Dabbagh, George Mason University, United States

A Usability Study on Low-Cost Virtual Reality Technology for Visualizing Digitized Canadian Cultural Objects: Implications in Education ............................................................................................................................. 259
Miguel A. Garcia-Ruiz, Algoma University, Canada; Pedro C. Santana-Mancilla & Laura Sanely Gaytan-Lugo, University of Colima, Mexico

Student Perceptions of the Effectiveness of a Cyberbullying Prevention Training Program ............................................................................................................................. 265
Kay K. Seo, Ben Just & Melinda Victor, University of Cincinnati, United States

Project Based Learning: from the Idea to a Finished LEGO® Technic Artifact, Assembled by Using Smart Glasses ............................................................................................................................. 269
Michael Spitzer, Virtual Vehicle Research Center, Austria; Martin Ebner, Graz University of Technology, Austria
Affordance Analysis of Google+ Features: Advancing Teaching and Learning in Higher Education .............................................................. 283
Boshra F. Zawawi, Maimoona H. Al Abri & Nada Dabbagh, George Mason University, United States

Interactively Exploring Graph Coloring Algorithms in a Bilingual Web Platform with Gamification ................................................................. 298
Maha Alrashed, Olaya Schools, Saudi Arabia; Lujain Alharbi, Omamah Talal Al-Muhammadi & Salha Bahadiq, Human-Computer Interaction (HCI) Lab, Saudi Arabia; Robert Hoehndorf & Liam Mencel, King Abdullah University for Science and Technology, Saudi Arabia

Activity Theory and Interactive Design for the African Storybook Initiative .................. 303
Alan Amory, Saide, South Africa

Collating Researchable Issues of African Digital Games ............................................. 313
Seugnet Blignaut, TELIT-SA, North-West University, South Africa; Werner S Ravyse, TELIT-SA, North West University, South Africa

Learning through Cultural Connections: The Northern Lights ........................................ 328
Lynda McGilvary, Lori Schoening, Doreen Hayward & Hannah Foss, Geophysical Institute, University of Alaska Fairbanks, United States

Indigenous Techno-gogies: Blended Online & Land-Based Mahoodle in Indigenous Studies .................................................................................. 329
Kirsten Mikkelsen & Ali M. AL-Asadi, Department of Arts and Education, Grande Prairie Regional College, Canada

Education as Reconciliation: Global Citizenship Curriculum, Digital Technologies and Indigenous Resurgence .............................................. 334
Hoa Truong-White, University of Ottawa, Faculty of Education, Canada

3D Mobile e-Learning System to Manage Synchronous and Asynchronous Video Lectures: NetLesson 16 and its application to a Multi-generation Solar Plant built in Egypt ........................................................................................................ 340
Flavio Fontana, ENEA, University of Rome, Italy; Alberto Giaconia & Enrico Cosimi, ENEA, Italy; Giangiacomo Ponzo, ISNOVA Consultant, Italy

More than one button: creating a successful and sustainable support model for the One Button Studio .................................................................. 350
Nicholas Smerker & Graham Berg, Media Commons at Penn State, United States

On Using Interactivity to Monitor the Attendance of Students at Learning-Videos ................................................................................. 356
Josef Wachtler & Martin Ebner, Educational Technology - Graz University of Technology, Austria
An Automatic Master Course Content Loading Design ................................................ 367
Xuemei Li, Norfolk State University, United States

An Open Source Learning System for K to 12 Homeschoolers in Developing Nations ........................................................ .................................................. 371
Maria eLiza Cornejo, myhill of St. John Bosco Parish Makati, Philippines, Philippines

Mikhail Fominykh, Molde University College, Norway; Volga State University of Technology, Russia, Norway; Ekaterina Prasolova-Førland, Department of Education and Lifelong Learning, Norwegian University of Science and technology, Norway; Tore C. Stiles, Department of Psychology, Norwegian University of Science and technology, Norway; Anne Berit Krogh, Department of Public Health and Nursing, Norwegian University of Science and technology, Norway; Mattias Linde, Department of Neuromedicine and Movement Science, Norwegian University of Science and technology, Norway

Developing application for arranging/grouping/structuring children's information which utilized on tablet PC ................................................................................................................................. 390
Hitoshi Nakagawa, The Open University of Japan, Japan, Japan; Masuo Murai & Yukie Sato, Kanazawa Seiryo University, Japan, Japan; Yuki Kobayashi, Yasuhara Elementary School, Japan, Japan; Aritomo Iwasaki, Itami J-highSchool, Japan, Japan; Hironori Suzuki & Jyunichi Morishita, Suzuki Education Software, Japan, Japan

Promoting Knowledge Building in Online Collaborative Learning in a Graduate Course ................................................................................................................................ 394
Qijie Cai, Minnesota State University, Mankato, United States

Learning Data Visualization through Virtual Reality ...................................................... 401
William Sause, Joseph Woodside & Shahram Amiri, Stetson University, United States

A systematic review of literature on students as educational computer game designers ................................................................................................................................. 407
Kevser Hava, Bozok University, Turkey; Hasan Cakir, Gazi University, Turkey

Does learning a programming language require learning English? A comparative analysis between English and programming languages ................................................................................................................................. 420
Ivan Ruby & Bojana Krsmancovic, Concordia University, Canada

Digital Literacy for all students and staff. Adapting Self-Directed Learning to achieve deep-level learning in a future-focused learning environment ................................................................................................................................. 428
Lore Demedts, Artevelde University College Ghent (Belgium), Belgium; Dries Vanacker, Artevelde University College, Belgium
Encouraging Collaborative Learning in Online Courses with Yammer Enterprise Social Network ................................................................. 434
Michelle Hale, The University of Alabama, United States

Student’s Evaluations of group process via a Group Awareness Tool .................. 440
Kyungbin Kwon, Indiana University Bloomington, United States

Active Learning Outdoor the Classroom using Mobile Projection Sets ..................... 446
Susumu Sawai, Information Research Center for Learning, Japan

Cooperative Learning and Web 2.0: A Social Perspective on Critical Thinking ................................................................. 455
Rae C. Schipke, Central Connecticut State University, United States

Cognitive strategies to improve group problem solving and learning ..................... 465
Ellen Taricani, Penn State University, United States

Cooperative Learning for Dance with CG Animation ............................................. 470
Yoko Usui, Tohoku Gakuin University, Japan; Katsumi Sato & Shinichi Watabe, Tohoku University, Japan

Obstacles to the adoption of MOOCs in flipped classrooms: Students’ and teachers’ perspectives ........................................................................ 476
Caroline Cloonan & Narjes Sassi, ISG Paris, France

Teaching Kids to Care: A Needs-Based Intervention to Increase Ethical Sensitivity in Schools ........................................................................... 481
Rebecca Friedman, Johns Hopkins University, United States

Plagiarism Certificates and Student Understanding .................................................. 485
Kim Livengood, Twyla Tasker & Brook Dickison, Angelo State University, United States

Integrating Simulation Centre for Teaching in Master University Students into the Family Guidance Course ......................................................... 490
Sonia Rivas, University of Navarra, Spain

Lessons Learned: Comparison of Three Cases of Design Based Learning Activities ......................................................................................... 496
Hasan Cakir, Gazi University, Turkey; Kevser Hava, Bozok University, Turkey; Mustafa Sarıtepeci, Ministry of National Education - Turkey, Turkey; Gül Özüdoğru, Ahi Evran University, Turkey

Community of Inquiry and Perceived Learning: The Impact of Blended Learning among High School Students .................................................. 501
Kyleigh Harrell, Liberty University, United States; Jillian Wendt, University of the District of Columbia, United States
Effect of Teachers' Professional Development in Media Technology on Preschoolers Learning in Rural Settings ......................................................................................................................... 509
Hamid Ikram, GC University Faisalabad, Pakistan

South American K-12 Faculty Perceptions of Classroom Technology Usage and Effectiveness .................................................................................................................................................. 514
Erik Kormos, Indiana University of Pennsylvania, United States

Assessment Without Testing: Using Performance Measures Embedded in a Technology-Based Instructional Program as Indicators of Reading Ability ............ 520
Alison Mitchell, Lexia Learning, United States; Lauren Baron, MGH Institute of Health Professions, United States; Paul Macaruso, Community College of Rhode Island, United States

The Nightmare is Over: A Simple Guide to Design Effective Subject Outlines .............................................................................................................................................................. 528
Jorge Reyna, University of Technology Sydney, Australia

How Present Are You? Best Practices in Improving Social, Teaching, and Cognitive Presence in Online Graduate Education .............................................................................................................................. 537
Rena Robey, Johns Hopkins University/DoD, United States; Crista Crago-Spangler, Johns Hopkins University, United States

Assessing Reading in Young Learners: Using a Computerized Adaptive Reading Test for Pre-kindergarten through 2nd Grade ........................................................................................................ 540
Haya Shamir, Waterford Research Institute, United States

E-learning Material Development for Improving Reading Proficiency: From a Research Perspective on Eye Tracking ....................................................................................................................... 552
Makoto Shishido, Tokyo Denki University, Japan

Evaluating the Online Teacher: An Analysis of the iNacol Quality Standards for Online Teaching ......................................................................................................................................................... 558
Brianne Jackson, Virginia Commonwealth University, United States

Teacher Perspectives on Technology Integration Professional Development: Formal, Informal, and Independent Learning Activities .................................................................................................................. 566
Monty Jones, Virginia Commonwealth University, United States; Sara Dexter, University of Virginia, United States

The Journey Through Online Content Development in a K-8 School: Training and Framework Needs for Educational Technologists ........................................................................................................ 578
Jeungah Kim, Lawrence Family Development Character School, United States
Strategies for Engaging Faculty in Instructional Design ................................. 584
Yingjie Liu, San Jose State University, United States; Patrick Dempsey, Johns Hopkins University, United States

Blended learning for teachers: a step-by-step guide. Offering a training module about blended learning via … blended learning ................................................................. 589
Dries Vanacker & Frederic Raes, Artevelde University College, Belgium

Feedback from a Faculty Certification Course for Online Teaching: Desired Training Content and Activities ........................................................................................................ 595
Ngoc Vo, Yinning Zhang, Angela Brodsky, Nihal Gunay, Jodi Fissel & Christy Talley-Smith, eCampus, University System of Georgia, United States

From Practitioners to Instructors: Developing an effective Blended Instruction Certification Course for Adjunct Instructors in a Low-Residency MBA Program ........................................................................................................ 602
Michael Weston, St. Edward’s University, United States

Resisting the New World: Constructions of Teachers and Change in Educational Technology Discourse .............................................................................................. 607
Sarah Blum-Smith, Harvard University, United States

Closing the Gap: How Can the School System Embrace the Age of Acceleration? ..................................................................................................................... 615
Mario Chiasson & Viktor Freiman, Université de Moncton, Canada

Content Analyses of Student Asynchronous Discussions in Online and Blended Sections of a Graduate Course ............................................................................................. 621
Gayle Davidson-Shivers, Suriya Thongsawat, Angela Doucet Rand, T. Shane Mitchell & Crystal Thomas, University of South Alabama, United States

Instructional Design & Development Alumni: A Valuable Untapped .................................................. 630
Gayle Davidson-Shivers, Shelitha McKissick & Gurupreet Khalsa, University of South Alabama, United States

Use of an avatar to generate feelings of face-to-face contact in an online class ................................................................................................................................. 637
Karla Hamlen, Cleveland State University, United States

Teaching Hands-On Cyber Defense Labs to Middle School and High School Students: Our Experience from GenCyber Camps ........................................................... 640
Peng Jiang, Xin Tian, Chunsheng Xin & Wu He, Old Dominion University, United States
Practical Example of Programming Education at Public Elementary School in Japan with Attitude Survey of Students and Teachers ............................................................ 645
Yuki Kobayashi, Ibaraki University, Japan; Hitoshi Nakagawa, The Open University of Japan, Japan; Masuo Murai & Yukie Sato, Kanazawa Seiryo University, Japan

Towards optimizing MOOC pedagogy: Learner self-control study ......................... 650
Christine Kroll, University of Buffalo, United States; Anne Reed, University at Buffalo, United States

Recursive Composition and "Happy Accidents": A Collaboration for Teaching Video Production ................................................................. 657
Mary Ann Mengel & Jeanne Marie Rose, Penn State University, Berks, United States

Student Preparedness for Interaction in an Online Learning Environment .............. 662
Mitchell Parkes & Peter Fletcher, University of New England, Armidale, Australia

Feedback Meaning in Health Professions Education Using Virtual Education: A Grounded Theory Analysis ................................................................. 666
Santiago Patiño-Giraldo, Universidad de Antioquia. Hospital Pablo Tobón Uribe, Colombia; Hector Cardona, Institución Universitaria Tecnológico de Antioquia. Universidad de Antioquia, Colombia; Carlos Yepes, Universidad de Antioquia. Hospital Pablo Tobón Uribe, Colombia

There is More to Digital Learning than Counting on Your Fingers: Transforming Learning and Teaching with Digital Pedagogy. ................................................................. 672
Lyudmila Smirnova, Bojan Lazarevic & Veronica Malloy, Mount Saint Mary College, United States

Identifying Effective Frameworks and Instructional Strategies for Sustaining M-Learning ..................................................................................... 689
James Barnes, University of Memphis, United States

Achieving Complex Learning Outcomes Through Adoption of a Pedagogical Perspective: A Model for Computer Technology Delivered Instruction ......................... 695
Breshanica Bellard, University of North Texas, United States

The CASPA Model: An Emerging Approach to Integrating Multimodal Assignments ................................................................................................. 709
Michael Blum & Adam Barger, College of William & Mary, United States

The use of learning tools for active knowledge construction to develop coding skills ................................................................................................. 718
Jacqui Chetty & Duan van der Westhuizen, University of Johannesburg, South Africa
The "PICCA" Model for Online Instructors: A Framework for Student Success
Gina Cicco, St. John’s University, United States

Problem-Solving Attitudes and Gender as Predictors of Academic Achievement in Mathematics and Science for Canadian and Finnish Students in the PISA 2012 Assessment
Maria Cutumisu & Okan Bulut, University of Alberta, Canada

Examining English Language Teachers’ TPACK in Oral Communication Skills Teaching
Mohammed Debbagh & W. Monty Jones, Virginia Commonwealth University, United States, United States

The Use of Facebook for Teaching Oral Communication Skills to English as a Second Language Students
Mohammed Debbagh & W. Monty Jones, Virginia Commonwealth University, United States, United States

Technology Integration in STEM Flipped Classrooms Using SAMR Framework as a Benchmarking Tool
Tuhin Dey, Purdue University, United States

Reasons why some university students avoid the online learning environment in blended courses.
Robert Ellis, University of Sydney, Australia, Australia; Feifei Han, University of Sydney, Australia

Online Classroom Project: Writing Digital Profile Summaries
Caroline Fitzpatrick, Alvernia University, United States

Teaching Assessment in an Online Environment: Ethical Conflicts, Concerns, and Solutions
William Garner, University of Arkansas at Little Rock, United States

Let's Flip It!: Delivering Information Literacy Instruction in the First Year Experience
Denise Garofalo, Mount Saint Mary College, United States

Applications of Flipped Instruction in the Corporate Training Environment
Guinevere Hedden, NJCU, United States

Enriching literacy learning with mobile devices in a flipped classroom
Paula Hodgson, The Chinese University of Hong Kong, Hong Kong; Diane Hui, Lingnan University, Hong Kong
Exploring Nigerian University Students’ Perception towards Mobile Learning ............................................................................................................................. 833
Eloho Ifinedo, Marja Kankaanranta, Pekka Neittaanmäki & Timo Hämäläinen, University of Jyvaskyla, Finland

Effect of Learning Technology by Design (LBD) Activities on Technology Integration Self-Efficacy Beliefs of Pre-Service English Teachers. ................................................................. 843
Halil Kayaduman & Omer Delialioglu, Middle East Technical University, Turkey

Investigating the Impact of Embedded Questions in Online Presentations in a Hybrid Undergraduate Educational Psychology Course ........................................................................ 850
Jane Kenney & Michelle Fisher, West Chester University of Pennsylvania, United States

Using iPads in Instruction: A Case Study ................................................................................................................................. 854
Min Liu, Zilong Pan & Hyeyeon Lee, University of Texas at Austin, United States

Using multiple modalities to raise awareness of enacting ‘critical’ pedagogies in teacher education ........................................................................................................... 860
Kerrie Mackey-Smith, Flinders University, Australia

Improving access to learning through the use of podcasts delivered on mobile technology ................................................................................................................................. 864
Maria Madiope & Antonia Makina, University of South Africa, South Africa

Constructing Electronic Word Games to Improve Students’ Vocabulary ................................................................. 869
Margaret McGregor, Chicago Public Schools/Illinois Virtual School, United States

In their own words: Using open education as a generative learning strategy to create a multi-author open resource on educational technology as a socio-technical system ........................................................................................................ 875
Stephanie Moore, Christianna Andrews & Leeanne Porta, University of Virginia, United States

Web-based Instruction for Adult Learners: Constructivist and Connectivist Theories ................................................................................................................................. 879
Mabel CPO Okojie, Mississippi State University, United States; Tinukwa C. Boulder, Gannon University, United States; Wei-Chieh Yu, Mississippi State University, Taiwan

A Review of the Studies Using Digital Storytelling in In-Service and Pre-Service Teacher Training ................................................................................................................................. 886
Gül Özüdo#ru, Ahi Evran University, Turkey; Hasan Cakir, Gazi University, Turkey
Designing your Flipped Classroom using the Flipped Teacher & Flipped Learner (FTFL) Framework ................................................................. 892
Jorge Reyna & Peter Meier, University of Technology Sydney, Australia

Using Learner-Generated Digital Media (LGDM) as an Assessment Tool ............. 898
Jorge Reyna & Peter Meier, University of Technology Sydney, Australia; Mike Mimirinis, Anglia Ruskin University, Cambridge, UK, United States; Marija Franetovic, Wayne State University, Detroit, MI, United States

Locus of Control – Online Instruction Using Web Conferencing Tool .................. 904
Yong Seng Tan, Kent State University, United States

Education Required for Digital Art in the Future: From the Education Theory of A Modern Artist ................................................................. 909
Shoko Usui & Katsumi Sato, Tohoku University, Japan

Infusing Authentic Learning into Online Courses: a Case of Online Introduction to Sociology ................................................................. 913
Ngoc Vo, Angela Brodsky & Marla Wilks, eCampus, University System of Georgia, United States; Jason Goodner, Albany State University, United States; Kelley Christopher, University of West Georgia, United States

Thinking out loud: Using 'show and tell' apps for assessment in mathematics ................................................................. 925
Sandra Williamson-Leadley, Naomi Ingram & Keryn Pratt, University of Otago College of Education, New Zealand

The Comparative Effects of Online Student-Generated Multiple-Choice Questions with and Without Student-Generated Feedback on Learning ........................................... 931
Fu-Yun Yu, National Cheng Kung University, Taiwan, Taiwan; Wan-Shan Wu, National Cheng Kung University, Taiwan

When Technology Does Not Add Up: ICT Use Negatively Predicts Mathematics and Science Achievement for Finnish and Turkish Students in PISA 2012 .................. 935
Okan Bulut & Maria Cutumisu, University of Alberta, Canada

Graded and non-graded assessment tasks in MOOCs ........................................... 946
Paula Hodgson, The Chinese University of Hong Kong, Hong Kong

The Multiplication Table as an innovative Learning Analytics Application ........ 952
Eltion Kraja, Behnam Taraghi & Martin Ebner, Graz University of Technology, Austria

Bringing VR to Your Class/School: Where to Start ........................................... 963
Yingjie Liu, San Jose State University, United States
Mobile, Social, Smart, and Media Driven The Way Academic Net-Generation Has Changed Within Ten Years ................................................................. 968
Walther Nagler, Martin Ebner & Martin Schön, Graz University of Technology, Educational Technology, Austria

Toward Open Networked Learning Environments: An Ecological Approach to Learning Design in MOOCs ................................................................. 978
Mohsen Saadatmand, University of Helsinki, Finland

Learning math with tablet devices: An exploratory study examining time spent on the app in academic performance. ...................................................... 982
Hsiao-chi Chang Tzeng, University of California, Santa Cruz Extension, United States

A Tool to Assess Fine-grained Knowledge from Correct and Incorrect Answers in Online Multiple-choice Tests: an Application to Student Modeling ................................................. 988
Patricia Albacete, Scott Silliman & Pamela Jordan, Learning Research and Development Center, University of Pittsburgh, United States

An Exploratory Study of the Experience and Practice of Participating in Paper Circuit Computing Education ........................................................................ 997
Myunghee Kang, Ewha Womans University, Korea (South); JeeEun Jang, Envisible, Inc., Korea (South); Seonghye Yoon, Minjeng Kang & Warren Chung, Ewha Womans University, Korea (South)

Overcoming the Fear of Coding: A Qualitative Analysis of the Remix Approach ........................................................................................................ 1006
Joe Sanchez, Queens College - City University of New York, United States

The value and challenges of using web conferencing technology to integrate online students into campus activities ......................................................... 1011
Chris Roddenberry, Wake Technical Community College, United States

Improving Head Start Students’ Early Literacy Skills Using Technology .................. 1018
Haya Shamir, Erik Yoder, Kathryn Feehan & David Pocklington, Waterford Research Institute, United States

Preparing Students to Kindergarten Using UPSTART at Home .............................. 1028
Haya Shamir, Claudia Miner, Ann Izzo, David Pocklington, Kathryn Feehan & Erik Yoder, Waterford Research Institute, United States

If We Build It, Will They Come? A Mathematics Adaptive Tutorial Experience .......................... 1042
Heather Weltman, University of New South Wales, Sydney, Australia; Victoria Timchenko & Nadine Marcus, University New South Wales, Sydney, Australia
The Effects of Citing Peer-Generated Questions during an Online Student Test-Construction Learning Task ................................................................. 1046
Fu-Yun Yu, National Cheng Kung University, Taiwan, Taiwan; Ju-Ko Wei, National Cheng Kung University, Taiwan

Does the Homework Format Really Matter? The Impact of Homework Format and Learning Style on Accounting Students’ Learning Engagement and Academic Achievement .................................................................................................................... 1050
Pat Maxwell, Kari Smoker & Susan Stites-Doe, The College at Brockport, State University of New York, United States

Building an Online Virtual School ................................................................................................................................. 1061
Christopher Carnahan, Doctoral Program Coordinator, New Jersey City University, United States; Kimberly Crowley & Norma Fernandez, Jersey City Public Schools, United States

Outcomes from Technology Enhanced Informal Learning Activities: Total Solar Eclipse .............................................................................................................................. 1064
Rhonda Christensen, Gerald Knezek, Doug Darby, Samson Den Lepcha, Bihan Jiang, Anna Kuo & Andrew Wu, University of North Texas, United States

Opinions of Early Childhood Experts About Design and Utilization of Interactive E-Books ................................................................................................................................ 1072
Figen Demirel-Uzun & Hasan Cakir, Gazi University, Turkey

Role-playing and Experiential Learning in a Professional Counseling Distance Course .............................................................................................................................. 1078
Mikhail Fominykh, Molde University College, Norway; Volga State University of Technology, Russia, Norway; Peter Leong, College of Education, University of Hawai’i-Manoa, United States; Brenda Cartwright, Winston-Salem State University, United States

Developing a Big Game for Financial Education Using Service Design Approach .......................................................................................................................... 1091
Myunghee Kang, Seonghye Yoon & Minjeng Kang, Ewha Womans University, Korea (South); JeeEun Jang, Envisible, Inc., Korea (South); Yujung Lee, Financial Education Council, Korea (South)

Towards Game-Based Formative Assessment .......................................................................................................................... 1104
Kristian Kiili & Antero Lindstedt, Tampere University of Technology, Finland

A teacher reporting tool for a math game – enhances teaching and learning .......................................................................................................................................................... 1110
Arttu Perttula, Tampere University of Technology, Finland
Designing an Interactive Student Orientation to Build Social Connectedness
Suriya Thongsawat & Gayle Davidson-Shivers, University of South Alabama, United States; Bhudnumphueng Chatphoomiphong, Assumption University of Thailand, Thailand

Development of a Multimedia Computer Application to Teach Making Words Lessons
Ling Wang, Austin Peay State University, United States

TEACHING ONLINE - Converting the classroom lecture to an online Blackboard Module
Gregory Wurzer, University of Saskatchewan, Canada

Online Video in Higher Education: Uses and Practices
Joseph Chapes, University of Kansas, United States

Examining Perceived Satisfaction Related to the Digital Storytelling Process
Mustafa Sarıtepeci, Ministry of Education, Turkey; Hasan Çakır, Gazi University, Turkey

Using Adaptive CAI to Supplement Literacy Development in Early Learners
Haya Shamir, Erik Yoder, David Pocklington & Kathryn Feehan, Waterford Research Institute, United States

Video Supported Flipped Classroom
Tayfun Tuna, University of Houston, United States; Tuhin Dey, Purdue University, United States; Jaspal Subhlok & Leigh Leasure, University of Houston, United States

Mathematics Learning Tools for Children with Dyscalculia
Paul Walcott & Nikisha Romain, The University of the West Indies, Barbados

Comparison of 360 Degree Cameras and Normal Cameras in Terms of Presence
Yuichiro Yamashita, Tohoku Fukushi University, Japan; Taira Nakajima, Tohoku University, Japan

Assessing the Learning Experiences of Geriatric Learners during Web-Based Instruction with Neurophysiological Methods
JoAnne Scott, Instructional Design Practitioner & Researcher, United States; Enilda Romero-Hall, University of Tampa, United States
Online Learning in the 30 Community Colleges of the State University of New York: Differences in Outcomes between Classroom and Online Coursework .......... 1192
Peter Shea, University at Albany, SUNY, United States; Temi Bidjerano, Furman University, United States

The Use of Augmented Reality to Increase Efficiency in Preparing Undergraduate Nursing Students for New Clinical Settings ......................................................... 1199
Sarah Ball, Mark Panning, Jacque Miller, Anne Schoening, Dana Koziol, Cindy Selig, Kandis McCafferty, Christina Murcek, Ethan Fukuda & Emily Koster, Creighton University, United States

Augmented Reality Applications for Multilingual Learning with Intuitive Understanding ................................................................. 1205
Hajime Mochizuki, Tokyo University of Foreign Studies, Japan

Educational Effects of a Virtual Reality Simulation System for constructing Self-Built PCs ......................................................................................... 1214
Shogo Teranishi & Yoshio Yamagishi, Kanazawa Institute of Technology, Japan

Who needs experts? Students designing a Synthetic Learning Environment of the Fukushima nuclear power plant. ......................................................... 1223
Michael Vallance, Yuto Kurashige, Tomohiro Sasaki & Takurou Magaki, Future University Hakodate, Japan

Cybersecurity Behavior Training for Employees ................................................................................................................................. 1229
Mohd Anwar, North Carolina A&T State University, United States; Wu He, Old Dominion University, United States; Xiaohong Yuan, North Carolina A&T State University, United States

Increasing Student Performance by Incorporating Artificial Intelligence into Video-based Instruction: A Comparison of A-list Empire’s Educational Software to Khan Academy’s ......................................................................................... 1233
John Leddo, Rahul Kindi, Shaan Bhandarkar, Neeraj Chadeva, Kriti Ganotra, Pawan Jayakumar & Yash Somaiya, MyEdMaster, United States

Next-Generation Interactive, Educational Television: Using Artificial Intelligence and the Internet to Customize Instruction to Student Learning Needs ......................... 1242
John Leddo & Srinidhi Krishnamurthy, MyEdMaster, United States

Leveraging the LMS to Provide a Student Resource Center ................................................................................................................................. 1248
Linda Merillat, Washburn University, United States

Using Embedded Item Analysis Tool to Facilitate the Teaching and Learning Experiences in an Introductory Java Programming Course ........................................ 1253
Ade Ola & Xue Bai, Virginia State University, United States; Yingjin Cui, Northern Virginia Community College, United States
Accessibility and Course Design at Penn State Harrisburg ................................. 1259
Sean Pyle & Timothy Lengel, Penn State Harrisburg, United States

The Positive Impact of American Expatriate Educators’ Smartphone Usage and the
Maintenance of Native Culture Communal Ties .......................................................... 1264
Erik Kormos, Indiana University of Pennsylvania, United States

South African teachers’ experience of the use of tablet devices in the classroom
context through the lens of the technology acceptance model ..................................... 1270
Rabaitse Diseko & Thuladu Anna Nyamande, University of Johannesburg, South Africa

The Challenges and Benefits of Regular Face-to-Face Interactions at Large-Scale
Blended Learning Courses ............................................................................................. 1276
David Sichau & Lukas Fässler, ETH Zürich, Switzerland

Integrating Technology and Literacy: Creating an Interactive Storytelling Experience
with Augmented Reality .................................................................................................. 1286
Shahrzad (Sherry) Vafa, Rita Richardson & Charlene Murphree, University of Houston - Victoria, United States

Investigating the Interplay between New Technology and Continuing Professional
Education ....................................................................................................................... 1292
Scott Gibbons, Matthew Yauk & Kay K. Seo, University of Cincinnati, United States

Using Qualtrics e-Surveys to Bring AACU Teamwork Value Rubrics to Life and
Increase Usability ........................................................................................................... 1296
Mary Jo Parker, University of Houston-Downtown, United States

Student’s Experience in Online Intensive Mode (IM) Units at The Faculty of Business
and Economics .............................................................................................................. 1302
Jorge Reyna, University of Technology Sydney, Australia; Scarlet An, The University of Notre Dame, Australia

Digital Technologies for Training "Inquiry Physics" Teachers ....................................... 1311
Dorothy Langley, Holon Institute of Technology, Israel

InteractiveWall 3.1 - Formal and Non-Formal Learning at School with Web-3.0-based
Technology in Front of Large Multi-touch Screens ....................................................... 1317
Thomas Winkler & David Bouck-Standen, Institute for Multimedia and Interactive Systems, University of Luebeck, Germany; Martina Ide, Institute for Quality Development in Schools in Schleswig-Holstein, Germany; Alexander Ohlei & Michael Herczeg, Institute for Multimedia and Interactive Systems, University of Luebeck, Germany
ActeMotion as a Content-Oriented Learning Application in Secondary School: Media Control through Gesture Recognition as a Performative Process in Art Teaching

Martina Ide, Institute for Quality Development in Schools in Schleswig-Holstein, Germany; Thomas Winkler, Institute for Multimedia and Interactive Systems, University of Luebeck, Germany; David Bouck-Standen, Institute for Multimedia and Interactive Systems (IMIS), University of Luebeck, Germany
