Impact of Course Quality on Student Academic Performance .................................................. 74
Cassandra Shaw & Kathleen Irwin, American Public University System, United States; Thomas Schaefer & Chad Patrizi, American Public University, United States

ProblemPal: Generating Autonomous Practice Content in Real-Time with Voice Commands and Amazon Alexa ................................................................. 80
Neelay Trivedi, Students Coding Schools, Watchung Hills Regional High School, United States

Steerable Environmental Simulations for Exploratory Learning ........................................... 83
Michelle Zhu, Nicole Panorkou, Sowmith Etikyala, Debasmita Basu, Taheeda Street-Conaway & Pricilla Iranah, Montclair State University, United States; Daniel Mazol, Kearny School, United States; Corey Hannum, Ryan Marshall, Pankaj Lal & Bharath Samanthula, Montclair State University, United States

Disruptive Formality in Social Media Interaction Practices within a Saudi Higher Education Institution ......................................................................................... 93
Jamilah Alamri, King Abdulaziz University, Saudi Arabia

Connectedness in an Online Doctoral Program: Building Community and Advancing Understandings as Emerging Scholars ...................................................... 105
Tasnem Alarbi, Nouf Alghamdi, Lisa Beaulieu, Mihiri Meepegama, Nichole Scarlett, Christie Vanorsdale & Rachel Van Campenhout, Duquesne University, United States

Role of Social Media on Social Consciousness and Engagement ............................................ 110
Amani Bin jwair, Prince Sattam bin Abdulaziz University, Saudi Arabia

Digging into the PIT: A new tool for characterizing the social paleontological community ........................................................................................................... 121
Lisa Lundgren, Kent J. Crippen & Richard T. Bex, II, University of Florida, United States

Micro-Badging and Modular Service Learning Open Education Resources for the Developing World ........................................................................................................ 129
Deborah Cooke & Sarah Corbitt, Western Governors University, United States

Online Gateway Assessments in Applied Calculus ................................................................. 134
Erin Goodykoontz, Doug Squire & Cody Hood, West Virginia University, United States

A Study of Pulse Wave Analysis Based on Biological Data Measurements in Educational Experiments ................................................................................................ 139
Ryoya Hayashi, Tomohiro Nakahara, Hatsuho Nankai, Akihito Fujimoto, Takaya Masaki & Tetsuya Sato, Kobe City College of Technology, Japan
Utilizing e-Portfolios to Assess Skills, Dispositions, Content Knowledge and Application of Teacher Candidates .......................................................... 145
Loren Naffziger, Walden University, United States; Jessica Alvarado, National University, United States

Experience of Administering Formative Assessment in an Online Course Using a Mid-term Course Evaluation Strategy: An Exploratory Case Study at a Nursing School ................................................................................................................................. 148
Youxin Zhang, James Callahan, Joseph Peters & John Casken, University of Hawaii at Manoa, United States

Gender Differences on Computer Anxiety: A Meta-analysis of Studies from 1980s to 2010s ................................................................................................................................. 152
Yuen-kuang Cliff Liao, Center for Teacher Education, Chinese Culture University, Taiwan

Enhancing Student Learning Outcomes and Assessment through Alignment and LMS Delivery ............................................................................................................................... 160
Elizabeth Crawford & David Rausch, University of Tennessee at Chattanooga, United States

Effects of Integrating Computer Technology into Mathematics Instruction on Elementary Schoolers’ Academic Achievement: A meta-analysis of One-hundred and Sixty-four Studies from Taiwan ................................................................................................................................. 165
Yuen-kuang Cliff Liao, Center for Teacher Education, Chinese Culture University, Taiwan; Yung-Hsin Chen, National Taipei University of Education, Taiwan

Outcome Assessment of Vocabulary Instruction Software for Deaf College Students ............................................................................................................................. 174
Eugene Lylak, Rochester Institute of Technology/National Technical Institute for the Deaf, United States

Supporting Teaching/Learning with Automatically Generated Quiz System ........................................................................................................................................ 178
Kousuke Mouri, Tokyo University of Agriculture and Technology, Japan; Noriko Uosaki, Osaka University, Japan; Mohammad Nehal Hasnine, Kyoto University, Japan; Atushi Shimada, Kyushu University, Japan; Chengjiu Yin, Kobe University, Japan; Keiichi Kaneko, Tokyo University of Agriculture and Technology, Japan; Hiroaki Ogata, Kyoto University

Discovering Factors Associated with Academic Performance of High School Students in Saber 11th Test using Educational Data Mining Techniques ................................................. 188
Ricardo Timaran-Pereira, Arsenio Hidalgo, Javier Caicedo & Jorge Benavides, Universidad de Nariño, Colombia

Using Instructor-Created Video in the Distance Learning Classroom: Effectiveness and Methods for Production ................................................................................................................................. 198
Jimmy Barnes & Kelly Paynter, Jacksonville State University, United States

Creating a Faculty Learning Community to Share Best Practices in Distance Education
Kathleen Arban, Salisbury University, United States

Teaching with Technology Through Collaborative Student-Faculty Partnerships
Pearl Chen, Alexandra Heinemann, Hsiang-Yu Ho & Moses You, California State University, Los Angeles, United States

Pre-Service Teachers’ Self-Efficacy Toward Online Teaching
Rebecca Cooper, LaTeshia Warren, Ava Hogan-Chapman & Lynne Mills, Georgia Gwinnett College, United States

Higher Education Faculty Desire to Implement Digital Tools: A Follow-Up Study
Brianne Jackson, Virginia Commonwealth University, United States

Developing Effective Online Faculty Professional Development: A Case Study from the American College of Education
Crystal Neumann, American College of Education, United States; Jason Caudill, King University, United States; Natalie Pelham, American College of Education, United States

Exploring STEM Faculty’s Concerns in Adopting Virtual Laboratories
Shalaunda Reeves, Zhen Xu & Kent Crippen, University of Florida, United States

Preparing Faculty for Successful Instruction in Today’s Classroom
Valerie Rutledge, Elizabeth Crawford & Dawn Ford, The University of Tennessee at Chattanooga, United States; David Rausch, University of Tennessee at Chattanooga, United States

The Influence of Graduate Coursework on Teacher Leaders’ Ability to Integrate Technology into the Curriculum: Results and Comparison from a Follow-up Study on the Acquisition of TPACK Skills
Susan Marie Sibert, DeAnna Laverick & Crystal Machado, Indiana University of Pennsylvania, United States

Exploring a Comprehensive Exam in an Online Ed.D. Program: The Benefits and Challenges of Utilizing a Professional Practice Project
Aubrey Statti, The Chicago School of Professional Psychology, United States

How to Train Faculty When There Isn't Time
Claire Stuve & Shagufta Sami, The University of Toledo, United States
Perceptions and Perspectives of Southern Texas Public School Educators in Region One of the Value of Twitter on Professional Development and Educator Morale ............................................................ 345
Lucy Villarreal, Texas A&M University Kingsville, United States; Don Jones, Linda Challoo & LaVonne Fedynich, Texas A&M University - Kingsville, United States

Gracefully herding cats: Systematizing instructional design and quality assurance without losing your mind ........................................................................................................ 351
Daron Williams, Virginia Tech - LED/TLOS, United States; Larry Cox & Eunice Ofori, Virginia Tech LED/TLOS, United States; Matt Louvet, Virginia Tech - TLOS, United States; Lujean Baab, Virginia Tech LED/TLOS, United States

Improving School Safety in the E-Learning Era .................................................................... 356
Edward A. Hernandez & Daniel A. Tillman, The University of Texas at El Paso, United States

Lesson-based case online learning: An innovative program to promote teacher professional development in China ................................................................................ 361
Zhinan Huang, National Center for Educational Technology, China; Weidong Chen, Qiaozhu Junior Middle School, China; Manli Huang, Puning No.2 Middle School, China; Xuguang Huang, National Center for Educational Technology, China

Students’ Perceptions of Telepresence: A cross-sectional view in health professions ........................................................................................................................ 366
Richard Pierce, Erika Francis, Morgan Nowak, Camilla Hollen, Stephanie Bernard & Rachel Carlson, Shenandoah University, United States

Getting Certified: Factors Influencing the Pursuit of IT Certifications ................................. 372
Weichieh Wayne Yu & Blake Haney, Mississippi State University, United States; Chun Fu Charlie Lin, National Formosa University, Taiwan; Mabel CPO Okojie & Chien Yu, Mississippi State University, United States

Using Learning Technologies to Mitigate the Impact of Chronic Absenteeism ................................................................. 378
Bennie Baker, University of North Texas, United States

Pre-Service Teachers’ Responses to Quest-Based Learning in a Mandatory Communication Technology Course ............................................................................. 382
Lorraine Beaudin & Olesha Ratther, University of Lethbridge, Canada

Workshop Series to Facilitate Classroom Technology Integration for In-Service Elementary and High School Teachers ................................................................................ 386
Giuliana Cucinelli, Concordia University, Canada
Design Thinking in Teacher Education: Preparing Engineering Students for Teaching at Vocational Schools ................................................................. 392
Thilo Harth, Fachhochschule Münster, Germany; Stefanie Panke, University of North Carolina at Chapel Hill, United States

Backward Designing a Technology Course for World Language Education .................................................................................................................. 408
Yuanhao Hua, Duquesne University, United States

Implications of Flipped Teaching Strategy on Preservice Teachers’ Self-efficacy and Intention to Integrate Technology in Future Classroom ........................................ 413
Mohamed Ibrahim & Rebecca Callaway, Arkansas Tech University, United States

The Effect of Programming-based TPACK Education Program on Self-efficacy Beliefs about Technology Integration of Pre-service Teachers .......................................... 422
Seong-Won Kim & Youngjun Lee, Korea National University of Education, Korea (South)

Integrating Technology Standards and Competencies for Students and Educators: Challenges and Opportunities ............................................................................. 427
Vittorio Marone, The University of Texas at San Antonio, United States

Using Moodle to enhance Mathematics learning in Grade 10 classrooms in South Africa ........................................................................................................... 429
Nicholas Mlotshwa & Agnes Chigona, Cape Peninsula University of Technology, South Africa

Digital Tools for English Language Learners in a Next Generation Science Standards Classroom ........................................................................................................ 439
Valeri Paul, PFM Associates, United States

Effects of a Teacher Training Course Using Robots on Informatics Teaching Efficacy in Non-informatics Teachers ................................................................. 444
Soyul Yi & Youngjun Lee, Dept. of Computer Education, Korea National University of Education, Korea (South)

Adaptive structuration theory used to examine organizational changes stemming from e-learning initiatives in higher education ......................................................... 449
Imonitie Atamenwan & Scott Warren, University of North Texas, United States

What do Medical Students Learn from Evaluating Flipped-Classroom-based Curriculum: A Grounded Theory Study ................................................................. 455
Weichao Chen & Elizabeth Bradley, University of Virginia School of Medicine, United States
Evaluating Technology Curricula via Analysis of Stratified Keyword Embeddings ................................................................. 461
Anna Hardy, Booker Smith, Allison Hopkins, Claudia Krogmeier & David Whittinghill, Purdue University, United States

Striving for A’s with OER: A Preliminary Report on Creating and Facilitating a Standards-Based Digital Content Development Process for Technology-Based Learning .......................................................................................................................... 467
John Hineman, Edward Eimiller & Beth Rosatone, Central Valley School District, United States

Adjunct Professor Preparation Conference: A Day of Learning ................................................................. 473
Annette Hux, Arkansas State University; Educational Leadership, United States; Joe Nichols, Cindy Nichols, Joan Henley, Jackie McBride, Mary Jane Bradley & Rick Hux, Arkansas State University, United States

Evaluation eConcordia: A Holistic Model ................................................................................................................................. 480
Wynn Paul Varela, Jihan Rabah & Anik de St-Hilaire, eConcordia KnowledgeOne Inc., Concordia University, Canada

Course Design Rubric: A Night at the OSCQRs! ................................................................................................................................. 485
Hilary Demske, Rebecca Lindsay & Janel Mitchell, Utah Valley University, United States

Make Quality Matter: Applying a Research-Supported Quality Assurance Process to Improve Online and Blended Learning at Course, Program, and Institutional Levels ................................................................................................................................. 487
Yaping Gao, Quality Matters, United States

Quality Assessments of MOOCs From the Student’s Point-of-view: Towards a Semi-Automated Student’s Feedback Analysis Method Adapted to the Needs of Educational Design ................................................................................................................................................................. 490
Pierre-Olivier Garand, Université du Québec à Trois-Rivières, Canada; Normand Roy & Bruno Poellhuber, Université de Montréal, Canada

Assessing the Pedagogical Effectiveness and Student Preference of Publisher Digital Content Presentation in Online Literature and Writing Instruction ................................................. 499
David Wolf & Alicia Richardson, Schenectady County Community College, United States

Implementing xAPI in Case-Based Learning for Nursing Education: Opportunities and Lessons Learned ................................................................................................................................................................. 504
Andrew Corbett, Betty Irene Moore School of Nursing, UC Davis, United States; Debra Bakerjian, Betty Irene Moore School of Nursing, United States
Construction of a Prediction Model of the Shortest Annual Graduation by Machine Learning Using Learning Environment Data .............................................................. 510
Hiroo Hirose, Takeshi Ozaki & Kurumi Kawate, Suwa University of Science, Japan; Yoshito Yamamoto, Tokyo University of Science, Japan; Hiroshi Ichikawa, Otsuma Women's University, Japan

The Use of Analytics for Educational Purposes: A Review of Literature From 2015 to Present ................................................................. 516
Min Liu, Zilong Pan, Xin Pan, Dongwook An, Wenting Zou, Chenglu Li & Yi Shi, University of Texas at Austin, United States

Learner analytics as a tool for guiding instruction: Identifying High Interest Discussion Topics in a MOOC. ................................................................. 526
Nathaniel Ostashewski, Dan Wilton & Martha Cleveland-Innes, Athabasca University, Canada; Sanjaya Mishra, Commonwealth of Learning, Canada

Development of a Self-Evaluation Checklist of Computer Operational Skills for First-year University Students .................................................. 530
Daisuke Kaneko, School of Economics, Hokusei Gakuen University, Japan; Yukiya Ishida, Chitose Institute of Science and Technology, Japan; Masaki Omata & Masanobu Yoshikawa, University of Yamanashi, Japan; Takaaki Koga, Saga University, Japan

Examination of the Psychometric Properties of the Spatial Ability Self Efficacy Scale (SASES) ................................................................. 535
Parviz Safadel, Texas Tech University Libraries: Informatics Media lab, United States; David White & Ehsan Ghasemi, Texas Tech University, United States

Understanding the competitive advantage of learning technologies in the context of post-secondary institution as corporate firm analogue: Depicting the context for higher education demand ................................................................. 540
Scott Warren, Heather Robinson, Imonitie Atamenwan & Monica Surrency, University of North Texas, United States

Performance-based learning and a proposed model of higher education organizational change ................................................................. 547
Scott Warren, Heather Robinson & Imonitie Atamenwan, University of North Texas, United States

University-Industry Collaboration for ICT Innovation in Sri Lanka ................................................................. 553
Chaminda Wijesinghe, National School of Business Management, Sri Lanka; Henrik Hansson, Stockholm University, Sweden; Colombage Ranil Peiris, DSV, Sweden

Kinematics for E-Learning: Examining Movement and Social Interactions in Virtual Reality ................................................................. 559
Catherine Bacos & Mark Carroll, University of Nevada, Las Vegas, United States
Using Virtual Reality and Telepresence Robotics in Making ........................................ 564
Bradley Barker & Dagen Valentine, University of Nebraska-Lincoln, United States; Neal Grandgenett, University of Nebraska at Omaha, United States; Jennifer Keshwani, University of Nebraska-Lincoln, United States; Andy Burnett, Knowinnovations, United States

Using Multi User Virtual Environments for Professional Development of Parent Educators .................................................................................................................. 569
Wales Brown, Empire State College Graduate Student Collaborative, United States

Validation of the Instructional Materials Motivation Survey: Measuring Student Motivation to Learn via Mixed Reality Nursing Education Simulation ..................... 576
Sean Hauze & James Marshall, San Diego State University, United States

Development of AI Educational Program for Employees to Meet the Era of the Fourth Industrial Revolution ......................................................................................... 587
Ryuji Miyazaki, Hiroshima International University, Japan; Toru Ochi, Osaka Institute of Technology, Japan; Hiroyuki Dekihara, Hiroshima Shudo University, Japan; Takuro Ozaki, Osaka Kyouiku University, Japan

Introducing K12 Teachers to Emerging Technologies within an Online Graduate Course that Used an Immersive Virtual Reality Environment ........................................ 594
Eileen Oconnor, Empire State College / SUNY, United States; Terri Worman, Empire State College, United States

A Formative Evaluation on a Virtual Reality Game-Based Learning System for Teaching Introductory Archaeology ...................................................................................... 605
Laura Shackelford & Wenhao David Huang, University of Illinois at Urbana-Champaign, United States; Alan Craig, National Center for Supercomputing Applications, United States; Cameron Merrill, Danying Chen & Jamie Arjona, University of Illinois at Urbana-Champaign, United States

Antidisciplinary learning and the TKF creativity spiral. ................................................ 612
Michael Vallance, Future University Hakodate, Department of Media Architecture, Japan

Extending Bain’s Framework to the Virtual Environment ............................................. 617
Angela Walters & Whitney Whitaker, Fort Hays State University, United States

The Effects of Korean Science High School Students’ Informatics-based Research Activities on Problem-Solving Ability ................................................................. 624
Ungyeol Jung & Youngjun Lee, Korea National University of Education, Korea (South)

Creating Sustainability Through Indigenous Food Security - The Sustainability Project Program ................................................................................................................ 629
Linda Robinson, SCcyber ELearning Community, Canada
Using GIS as a Cross-Curricular Vehicle for Student Learning ................................................. 636
David S. Brown, The University of Tulsa, United States; Justin McCrackin, Oklahoma State University, United States; Janet Cairns, The University of Tulsa, United States; Melissa Stirling, Holland Hall College Preparatory School, United States

The Effects of the Use of Internet and Phone on Students’ Performance across Different Disciplines ................................................................................................................................. 642
Rajvardhan Patil, Matt Brown, Mohamed Ibrahim, Rebecca Callaway & Reza Hamidi, Arkansas Tech University, United States

Communication Avenues in Online Programs .................................................................................. 651
Lesley Casarez & Dara Anderson, Angelo State University, United States

Enabling Cybersecurity Scholarship: Realizing the Requirements for a Collaborative Multi-functional Learning Space ................................................................................................................................. 657
Charles Lesko, East Carolina University, United States

Digital Storytelling: A Communication Tool and Method for Global Education .................................................. 666
Kim Engles, Sias International University, China; Annie Hale & Leanna Archambault, Arizona State University, United States

Using Quia as an Online Classroom for Teaching and Learning Fashion Design .............................................. 670
Nouf Alsuwaida, University of Hail, Saudi Arabia

Effectiveness of Two Educational Video Games ...................................................................................... 685
Taralynn Hartsell, Valdosta State University, United States; Timothy Dedeaux, Pearl River Community College, United States

Using Digital Game-Based Learning to Increase Vocabulary Fluency and Motivation .......................................................... 690
Mary Lasater & Shahzad Vafa, University of Houston-Victoria, United States

Simulated Environments as Complex Systems: A Framework and Approach to Understanding E-Learning (Part 1) ............................................................................................................................... 694
PG Schrader, Michael McCreery, Mark Carroll, Catherine Bacos, Danielle Head & Joseph Fiorentini, University of Nevada, Las Vegas, United States

What Do We Mean When We “Design” e-Learning Solutions? An Analysis of Discourses on Design, Technology, and Education .......................................................... 717
Melissa Warr, Danah Henriksen & Punya Mishra, Arizona State University, United States
Gamification of e-learning based on learning styles—design model and implementation .............................................................. 723
Nadja Zaric, RWTH Aachen University, Germany; Snezana Scepanovic, Faculty for Information Technologies, University, Montenegro

Introducing Data Visualization: A Hands-on Approach for Undergraduates .............................................................. 730
Vetria Byrd, Purdue University, United States

Analysis of Learning Competencies of the SW and Science Learners: In the Context of an Online SW and Science Program for Advanced Secondary Learners ..................... 737
Yoojung Chae & Sunghye Lee, KAIST, Korea (South)

Exam Study methods for the Online Student; HERE IS WHAT REALLY WORKS! .............................................................. 748
Jennifer Claire, Purdue University Global, United States

Machine-Learning-Based Automatic Difficulty Estimation of Quizzes in Question-Posing Learning ........................................ 754
Kazuki Harayama & Yoshio Yamagishi, Kanazawa Institute of Technology, Japan

Exploring Lived Experiences in Distance Learning: A Phenomenological Lens .............................................................. 762
Jolie Kennedy, University of Minnesota, United States

You Do, I Follow? Learners’ Perceived Learning Process on Online Social Network .................................................. 767
Jun Fang, Purdue University, United States

Effects of Online Tool Usage on Sense of Community in Undergraduate Seminars .............................................................. 773
Wakako Fushikida, Tokyo Metropolitan University, Japan

Using Social Media to Educate for Social Development: A Collective Case Study Comparing Facebook and E-mail as Tools for Developing Sustainable Habits in Urban Families .............................................................. 777
Michel Leger & Shawn Martin, Université de Moncton, Canada

Technology-enhanced Informal Learning for San Diego Zoo Visitors: Results of a Quasi-Experimental Program Evaluation .............................................................. 785
James Marshall, San Diego State University, United States
E-Learning in PreK-3: Selecting and Designing Grade-Level Appropriate Online Tutorials ................................................................. 795
Stephen Arnold, University of Arizona, United States

Facilitating Dynamic Synchronous Class Sessions ...................................................... 802
Joanne Beriswill, Mississippi State University, United States

Collaborative Learning in a Blended Learning Environment--A Case Study of a Web Design Course in a Midwestern University in USA ........................................................................... 995
Mingli Xiao, The University of Toledo, United States; Xiao Yang, Colorado Mountain College, United States

E-learning in collaborative professional development programs The case of training for curriculum design in higher education in Suriname ........................................................................ 1001
Genevieve Blanchard, Vrije Universiteit Brussel / FHR Institute for Higher Education, Suriname; Koen DePryck, Vrije Universiteit Brussel / Instituut voor KennisManagement, Belgium
Four Perspectives, One Goal: Creating Communities for Online Learners
Rhonda Newton, Ambyr Rios & Radhika Viruru, Texas A&M University, United States

Preparing for digital natives: Evaluating educational technology training in pre-service teacher colleges in Kenya. A narrative review of literature
Newton Buliva, University of North Texas, United States

Relationships between Demographic and Academic Student Characteristics and Success for Students in Online Courses
Jennifer Davidson, Moraine Valley Community College, United States

E-learning for (paramedic) telehealth: a roundtable discussion on a powerful combination
Koen DePryck, IIED, Paramaribo, Suriname; VUB, Brussels, Belgium; IKM, Dilbeek, Belgium, Belgium; Ilse Wambacq, Rachel Scheperle, Maryrose McInerney, Janet Koehnke & Joan Besing, Montclair State University, United States

Learned Helplessness, Computer Anxiety, and The Effect of Attribution Retraining A Review of the Literature
Larry Ferguson & Denelle Wallace, Norfolk State University, United States

The Influence of Vicarious Learning on Explicit Bias and Knowledge Retention in an Online LGBT Competency Training Program
Kody A. Ioia & Scotty D. Craig, Arizona State University - Human Systems Engineering, United States

Advanced Instructional Design for Successive E-learning: based on the Successive Approximation Model (SAM)
Hyojung Jung, Dankook University, Korea (South); Younglong Kim, Oklahoma State University, United States; Hyejeong Lee, Hangyang University, Korea (South); Yoonhee Shin, Hanyang University, Korea (South)

Digital Transformation and E-Learning in Initial and Continuing VET of German Companies
David Benjamin Meinhard & Regina Flake, German Economic Institute, Germany

Exploring the Realities of Technology Enhanced Feedback in Online Courses
Brian Sims, Michelle Hudiburg, Elizabeth Mascher & Susan Dellasega, Pittsburg State University, United States

Call Me Sentimental: A comparative analysis of instructor sentiment vs. instructional intentions in online learning environments
Matthew Stodolak, University of Toronto - OISE, Canada; Alison Mann, University of Toronto - OISE, Canada
Exploring the Use of Video Interaction in an Online Environment Using “Kaltura Interactive Quiz” ................................................................................................................................. 1075
LaQuata Sumter, Albany Technical College and University of North Texas, United States

Media Logic, Culture and Language - Designing and Delivering an Online Course ........................................................................................................................................ 1079
Xiaorui Sun, Ohio University, United States

“E” for Engaged: Energizing Student Engagement and Creativity with E-Learning Platforms .......................................................................................................................... 1083
Alejandro Villegas-Muro, University Autonomous of Chihuahua, Mexico; Daniel A. Tillman, The University of Texas at El Paso, United States

Teaching Differential Equations Using WebWork As An Online Tool ................................................. 1089
Larry Wang, Kennesaw State University, United States

VET2 101: Helping Military Transition Into The Civilian Workforce ................................................. 1093
Fatimah Wirth & James Wilburn, Georgia Institute of Technology, United States

Using Virtual Reality to Foster Higher Education Outcomes ................................................................. 1099
Imonitie Atamenwan & Scott Warren, University of North Texas, United States

Professor Garfield's 21st Century Digital Literacy Project: Supporting K-5 Teachers in their Digital Literacy Instructional Efforts ........................................................................ 1105
Jennifer George-Palilonis & Tiffany Watt, Ball State University, United States

Instructional Design as the Bridge to Businesses Becoming Dementia Friendly ................................................................. 1115
Lesa Huber & Victoria Abramendak-Lachheb, Indiana University, United States

The Impacts of Asynchronous Video Reflection on Social Presence: A Case Study ................................................................. 1119
Matti Koivula, University of Minnesota, United States

Designing the new generation of computer labs for a college of education ................................................................................................. 1129
Sean Leahy & Punya Mishra, Arizona State University, United States

Promoting transformative changes in mathematics teaching and learning in elementary schools through international online collaboration. ................................................. 1133
Irina Lyublinskaya, College of Staten Island, United States
RESL: A Web Browser Based Remote Embedded System Laboratory ................. 1140
Fernando Mosquera & Robin Pottathuparambil, University of North Texas, United States

Proposal of a model of profiles of engineering students related to their style
of learning and the way to think, applied in a course of Object-Oriented
Programming ............................................................................................................... 1151
Lourdes Sanchez-Guerrero & Jose Edgardo Moreno-Díaz, Universidad Autónoma Metropolitana-Azcapotzalco, Mexico;
Martha Mora-Torres, Ana Lilia Laureano-Cruses & Javier Ramírez-Rodríguez, Universidad Autónoma Metropolitana-
Azcapotzalco, Mexico

One-to-One Computer Program Implementation in Hawaii: Lessons
Learned ............................................................................................................................. 1158
Jonathan Schwartz, University of Hawaii West Oahu, United States; Zsuzsanna Szabo, Marist College, United States

E-learning for paramedic telehealth: Audiology in New Jersey, Paramaribo and the
Amazon forest. ............................................................................................................. 1164
Ilse Wambacq, Montclair State University, United States; Koen DePryck, IIED, Paramaribo, Suriname; VUB, Brussels,
Belgium; IKM, Dilbeek, Belgium, Belgium; Jerry Oldenstam, International Institute of Education for Development,
Suriname; Rachel Scheperle, Maryrose McInerney, Janet Koehnke & Joan Besing, Montclair State University, United
States

Text Messaging to Increase Job Satisfaction Among Early Childhood
Educators ....................................................................................................................... 1168
Christopher Devers, Johns Hopkins University, United States; Erin Devers, Indiana Wesleyan University, United States

Guidelines for the Most Effective Methods to Develop Applications for Higher Mobile
Learning .......................................................................................................................... 1172
Bryan Hernández-Cuevas, Elliot López-Collazo, Yessebell Rios-Correa & Edward Latorre-Navarro, University of Puerto
Rico at Arecibo, Puerto Rico

Understanding How Teachers Influence the Effectiveness of STEM-Based Mobile
Apps ............................................................................................................................... 1182
Robin Kay, UOIT, Canada

Negotiation as part of the innovation process: A case for democracy and dialogism in
tablet integration in education. ..................................................................................... 1187
Nicole Masek, Crème de la Crème, United States; Sharla Snider, Texas Woman's University, United States

Students’ Perceptions on the Use of Mobile Applications in English Language
Learning ....................................................................................................................... 1202
Jiawen Zhu, University of Florida, United States
Zoom Redefines Web Conferencing for Education ................................................................. 1208
Joanne Beriswill, Mississippi State University, United States

Instructor Presence in Online Course Design and Delivery: Building Rapport and
Revisiting the “PICCA” Model ............................................................................................ 1212
Gina Cicco, St. John's University, United States

Designing Online Film Courses using Self-Determination Theory as a
Framework .......................................................................................................................... 1217
Tuhin Dey, Purdue University, United States

SHOW YOUR WORK! Strategies for Student Assessment and Dynamic Content
Delivery for Online College Mathematics Courses .......................................................... 1222
Amy Goodman, Baylor University, United States

Reimagining the Curriculum: Up-scaling Online Programs through a Strategic
Partnership .......................................................................................................................... 1227
Tim Griffin & Lynnae Venaruzzo, Western Sydney University, Australia; Jay Cohen, Online Education Services, Australia

Reflections of Designers of an Online Orientation Program: Did We Get it
Right? .................................................................................................................................. 1233
Jane Hanson, University of Calgary, Canada; Carol Johnson, University of Melbourne, Australia; Jennifer Lock, Alicia
Adlington & Yang Liu, University of Calgary, Canada

Increasing authentic participation in asynchronous online discussions: Tips for
instructors and instructional designers .............................................................................. 1241
Kimberly Harrison, Aurora University, United States; Cynthia York & Hayley Mayall, Northern Illinois University,
United States

Exploring Relationships among Students’ Perceptions of Learning Content, Situational
Interest and learning outcomes in Online Learning .......................................................... 1252
Sunghye Lee, Hyejin Park & Yoojung Chae, Korea Advanced Institute of Science and Technology, Korea (South)

Interactive Course Content and the Tool Diffusion Management ................................. 1261
Xuemei Li, Norfolk State University, United States

Enhancing Library visibility through LMS: Best practices for providing information
literacy support ..................................................................................................................... 1265
Rano Marupova, Iowa State University, United States
