# TABLE OF CONTENTS

## Inclusive Instructional Design and UDL Around the World
Susie Gronseth, University of Houston, United States; Elizabeth Dalton, University of Rhode Island, United States; Radhike Khanna, Om Creations Trust and Shradha Charitable Trust, India; Boris Alvarez, Irma Iglesias & Paola Vergara, Fellow Group, Chile; Jeanne Carey Ingle & Heather Pacheco-Guffrey, Bridgewater State University, United States; Debra Bauder & Katherine Cooper, University of Louisville, United States; Cindy Anderson, Roosevelt University, United States; Kevin Anderson, University of Michigan, United States; Vivian Intatano, Raja Soliman Science & Technology High School, Philippines; Peggy Semingson & Kathryn Pole, University of Texas-Arlington, United States; Kerry Armstrong, Brenda Boreham & Terri Mack, Strong Nations, Canada; Lisa Harris, Winthrop University, United States; Dave Edyburn, University of Central Florida, United States; Janet Arndt, Gordon College, United States; Britt Tatman Ferguson, National University, United States; Nili Luo, Southwestern College, United States; Lindsay Yearta, Winthrop University, United States

## MOOC as a way to raise inclusion awareness in society: Portuguese case study
Manuela Francisco, Luís Filipe, Rita Cadima, Célia Sousa, Catarina Mangas, Graça Seco, Sandra Alves, Renato Coelho & Joana Sousa, Polytechnic Institute of Leiria, Portugal

## Practicing and prospective teachers’ pedagogical reasoning about using technology in their educational practice: Part 1
Joke Voogt, University of Amsterdam/Windesheim University of Applied Sciences, Netherlands; Michael Phillips, Monash University, Australia; Ottavia Trevisan & Marina de Rossi, University of Padova, Italy; Anneke Smits, Henk La Roi & Roland Brujin, Windesheim University of Applied Sciences, Netherlands; Judi Harris & Mark Hofer, William & Mary School of Education, United States; Petra Fisser, Netherlands Institute for Curriculum Development, Netherlands

## UDL for Inclusive Science Education
Heather Pacheco-Guffrey & Jeannne Ingle, Bridgewater State University, United States

## The Effectiveness of On-line Practicum Courses in Medical Education
Asmaa Radwan, Indiana University of Pennsylvania, United States

## Near peer video-based observations: Using student teaching videos to train aspiring school
W. Sean Kearney & James Jurica, Texas A&M University San Antonio, United States

## Trends in Rural Area School Librarian Candidates’ Technology Acceptance and Adoption
Haihong Hu, University of Central Arkansas, United States
"It was just doing what you know about and move on, you know, just to survive". A beginning elementary teacher’s story of using technology in the classroom during her first two years. ................................................................. 35
Ya-Huei Lu, East Carolina University, United States

A program for success: A reflective structure to enrich preschool children’s mathematical reasoning .......................................................................................................................... 40
Kelley Buchheister, University of Nebraska-Lincoln, United States

The Effects of Gender and Literacy in the Development of Computational Thinking Skills in 6th Grade Students .............................................................. 49
Gerald Ardito, Pace University, United States; Betul Czerkawski, University of Arizona South, United States

Bricklayer: Mathematics through Art and Coding .......................................................................................................................... 52
Michelle Friend, Paula Jakopovic, Betty Love & Victor Winter, University of Nebraska at Omaha, United States

Changing the Game: Teaching Elementary Mathematics Through Coding ................................................................................................................ 55
Paula Jakopovic, Michelle Friend, Betty Love & Victor Winter, University of Nebraska at Omaha, United States

Using TPACK to Teach #FutureTeachers in an Undergraduate Integrating Technology with Teaching Course ............................................................ 61
Julia Parra, New Mexico State University, United States

Teaching through the eyes of a robot Using Robotic Telepresence to Facilitate Early Field Experiences for Pre-Service Teachers ................................................. 65
Shawn Daley, Michigan State University, United States; Stephanie Murphy, Concordia University, United States

TOPRACE Model: A Practice of Online Instruction .................................................................................................................. 71
John Ronghua Ouyang, University of North Florida, United States

Exploring messaging in STEM YouTube Videos ................................................................. 76
Laurie O. Campbell, Tara Gibson, Jason Pollack & Stacy Watkins, University of Central Florida, United States

Social Media Closing the Distance in Online Education .................................................. 81
Lee Heller, Nova Southeastern University, United States

Justin’s Path to Learning Fractions Through Coding .................................................. 92
Lorraine Jacques, Louisiana Tech University, United States
#SocialMediaEd: Perspectives on Teaching about and with Social Media in Higher Education

Christine Greenhow, Michigan State University, United States; Benjamin Gleason, Iowa State University, United States; Daniel Krutka, University of North Texas, United States; Tonia Dousay, University of Idaho, United States; Jeff Carpenter, Elon University, United States

Rocket Roundup

Scott McKay, Mark Geary, Jim Maloney, Jennifer Nash & Jacob Geary, Dakota State University, United States

What Story Does Your Online Presence Tell? Helping Teacher Candidates Understand the Impact of Their Digital Footprint

Ricky Mullins, Eastern Kentucky University, United States; David Hicks, Virginia Teach, United States; Todd Ogle, Virginia Tech, United States

Dr. Skateboard’s Action Science and the Masters of Physics

William Robertson, Teacher Education Department, College of Education, the University of Texas at El Paso, United States

Preservice teachers’ decisions on the use of ICTs to teach science during teaching practice

Thuthukile Jita, University of the Free State, South Africa

Education Students’ Definitions of Creativity in Education: Developing Common Ground to Embrace Shifting Educational Contexts

Mia Kim Williams & Letha Mellman, University of Northern Colorado, United States

Recording the World: The Potential of Using Wearable Technologies to Teach Social Studies

Ricky Mullins, Eastern Kentucky University, United States; Cassidy Hall, University of Idaho, United States; Judith Painter, Salem City Public Schools, Virginia, United States; Melinda Davis, University of Idaho, United States; Jaap Vos, University of Idaho at Boise, United States

Understanding Adolescent Writing on Social Media: A Literature Review

Sarah Galvin & Christine Greenhow, Michigan State University, United States

Gamified Mars Learning Lab

Mark Geary & Jacob Geary, Dakota State University, United States

Faculty and students’ perspective towards Active Learning Classroom

Ali Rezaei, California State University, United States; Francine Vasilomanolakis, CSULB, United States
Digital Literacy and Perceptions of Truth: Confusion and Confirmation Bias ................................................................. 157
Kevin Krahenbuhl, Middle Tennessee State University, United States

Preservice Science Teacher Preparation Using Virtual Reality ........................................ 162
Richard Lamb & Elisabeth Etopio, University at Buffalo, United States

Online Tutoring: Exploring Pre-Service Teachers to Serve Rural/Native Area Students ......................................................... 168
Hsing-Wen Hu, Grant Sasse & Katie Walker, University of Alaska Anchorage, United States

Stop, Collaborate, and Listen: Facilitating Community, Connection, and Communication in the Online Classroom .................................................. 173
Susie Gronseth & Jingyuan Fu, University of Houston, United States

Faculty Resistance to Technology Integration ........................................................................ 175
Ileana Torres & Jessica Evans, TCSPP, United States; Michael Schneider, TSCPP, United States

Teaching How to Visualize the Invisible: Using Virtual Reality to Expose the Microscopic World of Chemistry ........................................ 178
Mia Kim Williams & Dalal Alrmuny, University of Northern Colorado, United States

Technology-facilitated Formative Assessment ........................................................................ 182
Natalie Johnson-Leslie, Arkansas State University, United States; Lan Li, Bowling Green State University, United States; Valentina Grion, University of Padova, Italy; Lara Kassab, San Jose State University, United States

Reciprocal Teaching and Padlet: Writing about Reading with Slovakian Students Learning English ........................................................................ 189
Victoria Seeger, Northwest Missouri State University, United States; Sara Worsfold, Currently working at a school in Cambodia., United States

Articulating and Applying Content using Student-Identified Video Clips ........................................ 191
Paula Christensen, Northwestern State University of Louisiana, United States

Makerspace Professional Development: A Self-determination Theory Analysis ......................................................... 197
Michael L Schad & Monty Jones, Virginia Commonwealth University, United States

Technology Binds or Blinds? - Social Networks through a Pedagogical Lens ........................................................................ 205
Tami Seifert, Kibbutzim College of Education, Technology, and Art, Israel
The Effectiveness of a Game about Learning Disabilities ................................................. 211
Carol Redfield, St. Mary's University, United States; Crystal Redfield, John Jay Science and Engineering Academy, United States

Practice and policy in K-12 online learning in New Zealand: What lessons are transferrable? ........................................................................................................................................ 238
Keryn Pratt, University of Otago, New Zealand; Sandra Williamson-Leadley, University of Canterbury, New Zealand

Boosting Communication: Using Point of View (POV) Video for Students with Disabilities as a Powerful Communication Piece with Parents .................................... 241
Cassidy Hall, University of Idaho Doceo Center, United States; Ricky Mullins, Eastern Kentucky University, United States; Aleksandra Hollingshead, University of Idaho, United States; Tonia Dousay, University of Idaho Doceo Center, United States

Using UDL-related methods in education, teacher training, and job-development for young women with developmental disabilities in India ........................................... 245
Susie Gronseth, University of Houston, United States; Elizabeth Dalton, Rhode island, United States; Boris Alvarez, Irma Iglesias & Paola Vergara, Fellow Group, Chile; Jeanne Carey Ingle & Heather Pacheco-Guffrey, Bridgewater State University, United States; Debra Bauder & Katherine Cooper, University of Louisville, United States; Cindy Anderson, Roosevelt University, United States; Kevin Anderson, University of Michigan, United States; Vivian Intatano, Raja Soliman Science & Technology High School, Philippines; Peggy Semingson & Kathryn Pole, University of Texas-Arlington, United States; Kerry Armstrong, Brenda Boreham & Terri Mack, Strong Nations, Canada; Lisa Harris, Winthrop University, United States; Dave Edyburn, University of Central Florida, United States; Janet Arndt, Gordon College, United States; Britt Tatman Ferguson, National University, United States; Nili Luo, Southwestern College, United States; Lindsay Yearta, Winthrop University, United States

Language Teachers’ Content-Specific Technology Integration Reflection through the Video-Embedded Reflective Inquiry Model ................................................................. 250
Ai-Chu Elisha Ding, Ball State University, United States

Building a Framework for Project Based Personalized Learning ........................................ 255
Brandie Shatto & Randy Hansen, University of Maryland University College, United States

Building Digital Learning Culture into Pre-service Teacher Education ................................. 261
Ismail Guven, Ankara University Faculty of Educational Sciences, Turkey; Yasemin Gulbahar, Ankara University, Turkey

Using Digital Tools to Increase Authenticity and Access in Performance-Based Assessment and Project-Based Learning ................................................................. 270
Kristina Doubet & Eric Carbaugh, James Madison University, United States

Measuring K-12 Computational Thinking Concepts, Practices and Perspectives: An Examination of Current CT Assessments ....................................................... 275
Catherine Adams, Maria Cutumisu & Chang Lu, University of Alberta, Canada
Girls Who Code: The Importance of Contributing to Their Future ........................................ 286
Lisa Baylor, Walsh University, United States

Design and Development of a Graduate Online Course to Prepare Teachers and School Librarians to Lead Computational Thinking in K-12 Contexts ........................................ 290
Kimberly Huett, University of West Georgia, United States; Bruce Neubauer, Albany State University, United States

Computational Thinking in Action: Paving the Way for Pre-service Teachers ................................................................. 296
Nadia Jaramillo, Tyanez Jones & Brittany Sweers, Iowa State University, United States

Infusing Computing Through Professional Development: Shifts in Content Area Teachers’ Understandings of Computational Thinking Integration ................................. 302
Robin Jocius, Jennifer Albert & Ashley Andrews, The Citadel, United States; Veronica Catete & Yihuan Dong, North Carolina State University, United States; Deepti Joshi & Richard Robinson, The Citadel, United States; Tiffany Barnes & Nicholas Lytle, North Carolina State University, United States

Children’s Perceptions of Participation in Programming Workshop with Their Parents .......................................................................................................................... 306
Yukiko Maruyama, Tokai University, Japan

Examining the difficulties of computational concepts and practices undergraduates encounter in an online learning environment ............................................................... 310
Hyunchang Moon & Jongpil Cheon, Texas Tech University, United States; SunGwan Han, Gyeong-in National University of Education, Korea (South)

Characteristics and Challenges of Japanese Computer Science Education in Elementary Level ................................................................................................................. 316
Michiyo Oda & Tatsuya Horita, Tohoku University, Japan

Applications of Computational Thinking to Solve Graph Problems ................................................................. 324
Gerard Rambally, University of North Texas at Dallas, United States

Infusing Computational Thinking Instruction into Elementary Mathematics and Science: Patterns of Teacher Implementation ................................................................. 330
Kathryn Rich & Aman Yadav, Michigan State University, United States

A Model for Integrating Computational Thinking into an Undergraduate Preservice Teacher Education Course ..................................................................................................... 335
Kristina Tank & Dennis Culver, Iowa State University, United States
Discourse Practice of Computational Thinking ............................................................. 341
Sasha Wang & Yu-hui Ching, Boise State University, United States; Steve Swanson, Boise State University, United States; Youngkyun Baek, Dazhi Yang & Bhaskar Chittoori, Boise State University, United States

Integrating computational thinking in elementary classrooms: Introducing a toolkit to support teachers. ......................................................................................... 347
Aman Yadav, Rachel Larimore, Kathryn Rich & Christina Schwarz, Michigan State University, United States

Computational Pedagogical Strategies to Help Learners Retain STEM Content Knowledge ................................................................................................................. 351
Osman Yasar, Peter Veronesi, Jose Maliekal & Leigh Little, State University of New York College at Brockport, United States; John Tillotson, Syracuse University, United States

Examining the Effects of Digital Fabrication in Middle School: Comparing Gifted and Non-Gifted Students ................................................................. 361
Vince Moore, Breckenridge ISD, United States; Tandra Tyler-Wood, University of North Texas, United States

Blogs as an Effective Social Media Tool in Education ........................................... 367
Emad Abu-Shanab, Qatar University, Qatar; Nawzat Alsmadi, Yarmouk University, Jordan

Using Online Education to Improve Traditional Classroom Instruction: A Blended Learning Approach ................................................................................. 374
Catherine Bacos & Karen Grove, University of Nevada, Las Vegas, United States

Piloting a QM-Inspired Quality Assurance Process for All Online Course Offerings at a Mid-sized University ................................................................. 380
Savilla Banister, Rachel Vannatta & Cindy Ross, Bowling Green State University, United States

Bringing Open Pedagogy to Practice in a Blended Graduate Course: Affordances and Challenges ......................................................................................... 386
Evrim Baran & Dana AlZoubi, Iowa State University, United States

Accommodating in the Online Course Environment for Students who are Deaf/Hard of Hearing ......................................................................................... 391
Terence Cavanaugh & Suzanne Ehrlich, University of North Florida, United States

Nudging, Not Shoving: Five effective strategies for motivation and success for online learners ................................................................................................. 398
Terence Cavanaugh & Nicholas Eastham, University of North Florida, United States
Student-Generated Discussion Activity: A Lever for Building a Community of Learners in an Asynchronous Online Learning ........................................................................................................ 405
Beomkyu Choi, Grand Valley State University, United States

How Do e-Learning Students Perceive Online Synchronous Instruction: A Scaling Tool ..................................................................................................................................... 410
Christina Churchill, University of North Texas, United States

Best Practices for Teacher Educators to Address Digital Security Issues in Synchronous Sessions and Webinars ................................................................. 416
Elizabeth Dalton, URI; Dalton Ed Services International, United States; Susie Gronseth, University of Houston, United States

How can we design online courses that are effective for student learning? (Roundtable) ...................................................................................................................... 420
Antoinette Marie Davis, Colorado State University-Global Campus, United States

Blurring Lines: Using Telepresence for Instructional Equity ............................................... 431
Veronica Ent, Saint Vincent College, United States

Big space, small groups: Lessons learned on the development of a small-group learning classroom to meet the needs of both large- and small-enrollment courses ............................................................................................................................... 436
Christopher Faulkner, Robert Rege & Dorothy Sendelbach, UT Southwestern Medical Center, United States

Think You Know What Learners Want in an Online Class? Think Again. .......................... 448
Jennifer Graham, Northern Maine Community College, United States; Lynne Manion, Eastern Maine Community College, United States

A mixed methods research proposal to examine the influence of external factors and expectations on the success of first time online learners. ............................................................. 454
Alexis Guethler, Towson University, United States

Tools for Seamless Teaching in Online and Hybrid Contexts ........................................ 460
Amanda Hurlbut & Karen Dunlap, Texas Woman's University, United States

Exploring Asynchronous Online Learner Experiences and Perceptions .......................... 466
Alicia Johnson, Kenneth Potter & Emily Bishop, Virginia Polytechnic Institute and State University, United States

Maintaining a Competitive Edge: How Trends Drive Innovations for Online Education in Higher Education ........................................................................................................ 473
Hong Lin, University of Oklahoma, United States
Engagement for Retention: Enhancing the Online Graduate Student Learner Experience Through the Development of a Virtual Community ............................................. 478
Sharonda Lipscomb, University of North Texas | University of Arkansas at Little Rock, United States

Online Assessment of Instructional Videos: Using Web Conference and a Content Analysis Tool ........................................................................................................ 484
Leping Liu, Li-Ting Chen, Wenzhen Li, Kathryn Hanselman, & Cong Zou, University of Nevada, Reno, United States

Self-efficacy and Motivation in Online Graduate Students ........................................... 492
Sari London, Grand Canyon University, United States; Ajay Das, SUNY Empire State College, United States

Rating effectiveness of instructional delivery: A faculty audit tool used at an online university. ........................................................................................................... 493
Pamela McCoy, Marilee Hall & Debra Chittur, Independence University, United States

A Fact File of Flexible Learning in Night Programs in Japan ........................................ 498
Terumi Miyazoe, Tokyo University of Science, Japan

Supporting Instructors in Redesigning Online Instruction Toward Student-Centered, Problem Based Learning ........................................................................... 504
Margaret Niess, Oregon State University, United States

A micro-learning based model to enhance student teachers’ motivation and engagement in blended learning .................................................................................. 509
Stavros Nikou, University of Strathclyde, School of Education, Faculty of Humanities & Social Sciences, United Kingdom

Virtual Mentoring- Creating a National Network of College and Career Ready Leaders ........................................................................................................ 515
Matthew Ohlson, University of North Florida, United States

MOOCs for language learning. Reality and prospects. ................................................... 540
Panagiotis Panagiotidis, Aristotle University of Thessaloniki, Greece

Pedagogical usability in the design of a learning module on virtual reality .............. 547
Minh Pham, University of Missouri, Columbia, United States; Xinhao Xu, Jhon Bueno & Hao He, University of Missouri, United States

The Impact of Music Genre Preferences on Immediate Recall and Long-Term Memory in e-Learning Modules ........................................................................ 552
Mark Piwinsky, Indiana University of Pennsylvania, United States; Lacey Fulton, Clarion University, United States; Sarah Everett, Emily Ortiz & Donald Winzer, Indiana University of Pennsylvania, United States
Online Graduate Advising: It's Much More Than 'What class comes next?'
Kristi Preisman, College of Saint Mary, United States

Best teaching patterns in multi-participant online courses
Tami Seifert, Miki Kritz & Orna Feliks, Kibbutzim College of Education, Israel

Integration of a Lesson Plan Webinar Series and Curated Digital Resources on Lesson Planning for Novice Educators
Peggy Semingson, University of Texas at Arlington, United States; Dana Owens, The University of Texas at Arlington, United States; Kathryn Pole, University of Texas at Arlington, United States

Integrating Course Improvement Strategies for Online Learners
Carrol Warren & Michelle Bartlett, North Carolina State University, United States

Recruitment Hacks: Designing Recruitment Strategies for Graduate Distance Programs
Carrol Warren, North Carolina State University, United States

Online Pre-Service Teachers’ Self-Regulated Learning: Do Authentic Teaching Cases and Mastery Approach Goals Play a Role?
Patricia Williams, Alyssa Gonzalez-DeHass, Jillian Powers & Ann Musgrove, Florida Atlantic University, United States

Online Spaces as Sources of Informal Learning for Teachers
Kimberly Zelonis, Lock Haven University, United States

Future Teacher Educators in Critical Evaluation of Educational Technology through Collaborative Digital Storytelling Projects
Imelda Bangun, Zhengjie Li & Patrick Mannion, University of South Florida, Indonesia

Assessing the instructional video through the lens of educational learning theories
Christina Churchill, University of North Texas, United States

Exploring student engagement with digital storytelling content using factor analysis
Medha Dalal, Arizona State University, United States; Leanna Archambault, Arizona State University, United States; Annie Hale, Arizona State University, United States

Increasing Learner Engagement through Course Journey Storytelling
Susan Elwood & Joseph Ramirez, Texas A&M University Corpus Christi, United States
Digital Storytelling: The Story is the Course ................................................................. 616
Larry Ferguson, Norfolk State University, United States; Deidre Henriques & Monika McGhee, Norfolk State University, United States

High Impact Practices in Digital Media Communication Undergraduate Capstone Experiences: Navigating Digital Story Telling and Client Expectations ................. 619
Mark Piwinsky, Indiana University of Pennsylvania, United States; Lacey Fulton, Clarion University, United States; Sarah Everett, Emily Ortiz & Donald Winzer, Indiana University of Pennsylvania, United States

Digital Story Telling: Teaching Techniques and Strategies for Multiple Educational Levels ................................................................................................................................. 625
Aubrey Statti & Kelly Torres, The Chicago School of Professional Psychology, United States

Development of an iPad App “Kumata” for K-9 students to make a simple picture-movie in a short time .................................................................................................................. 629
Hitoshi Susono, Eri Ono, Maki Hagino, Maho Yamanaka & Ayami Nishida, Mie University, Japan; Hirokazu Seko, Mie University, Shudo Elementary School, Japan

Re-using video records of practice in teacher professional development to engage in and develop mathematics teaching practice ................................................................. 634
Kara Suzuka, University of Hawai‘i at Mānoa, United States; Rebecca Frank & Elizabeth Yakel, University of Michigan, United States

Visualization in Teacher Education: Storytelling with Data .................................................. 639
Melda Yildiz, New York Institute of Technology, United States; Maria Cieslak & Georgia Holmes, Walden University, United States

Culturally Responsive and Equity-Focused Computer Science Professional Development ................................................................................................................................. 648
Diane Codding, Chrystalla Mouza, Lori Pollock & Scott Sheridan, University of Delaware, United States

Shamika Goddard, Techchaplaincy.com, United States; Xeturah Woodley, New Mexico State University, United States

Reconceptualizing Digital Citizenship Curricula: Designing a Critical and Justice-Oriented Digital Citizenship Course ................................................................. 665
Marie Heath & David Marcovitz, Loyola University Maryland, United States

Politics, Social Media, and Mobile Technology: Ensuring Ethics and Equity .................................................. 673
Stephanie Huffman, Erin Shaw & Stacey Loyless, University of Central Arkansas, United States
Crowdfunding Education with DonorsChoose.org: All Things Equal? ................................. 680
Matthew Koehler & Michael Lachney, Michigan State University, United States

Designing towards empathy using VR/iVR: Applying best practices to enhance student experience. ................................................................. 688
Rebecca M. Reese, Colorado School of Mines, United States

Fostering School Security During Teacher Preparation .............................................. 695
Daniel A. Tillman, Josefina V. Tinajero, Carleton H. Brown, William H. Robertson & Song A. An, The University of Texas at El Paso, United States

Tracking Identity Exploration Trajectories in Game-Based Learning ....................... 700
Amanda Barany, Hamideh Talafian, Mark Petrovich Jr., Mamta Shah & Aroutis Foster, Drexel University School of Education, United States

Using an Escape Room to Support the Learning of Science Content ....................... 710
Kerry Bartlett & Janice Anderson, University of North Carolina at Chapel Hill, United States

The Struggle is Real: Identifying Barriers to Successful Implementation of Serious Games in the Middle School Classroom ........................................ 716
Donald L. Becker, Monica Trevathan & Jana Willis, University of Houston- Clear Lake, United States

Diana Bogusevschi, Dublin City University, Ireland; Cristina Muntean, National College of Ireland, Ireland; Gabriel-Miro Muntean, Dublin City University, Ireland

Effects of user operation on the sense of reality in virtual reality with room-scaling .............................................................................................. 729
Haarin Choi, Heoncheol Yun, Museok Jeong & Min Cho, Chonnam National University, Korea (South)

SimSchool: SPARCing New Grounds in Research on Simulated Classrooms ...................... 733
David Collum, Missouri Baptist University, United States; Rhonda Christensen, University of North Texas, United States; Tim Delicath, Missouri Baptist University, United States; Vickie Johnston, Florida Gulf Coast University, United States

Virtual Reality and Video Games as Literary Tools in K-16 ........................................ 740
Miles Harvey, University of New Mexico, United States

Fostering Empathy through a Virtual World-based Game ........................................ 742
Scot Headley, George Fox University, United States
Virtual Worlds as Game Spaces ................................................................. 745
Scot Headley, George Fox University, United States

A Review of Theories for Developing Student Experiences through Pre-Instructional Activities with Digital Game-Based Learning ................................................................. 749
Heather Holbrook, Gwinnett County Public Schools, United States

Math or Magic? Creating a Serious Games through Design-Based Research ................................................................. 753
Rasmus Pechuel, Ingenious Knowledge, Germany; Marc Beutner, University of Paderborn, Germany

When Learning Tools Need to Handle More than Right and Wrong – Addressing the Challenges of Creating a Serious Game in the Field of Nursing Education ........................... 761
Miriam Peters, Philosophisch-Theologische Hochschule Vallendar, Germany; Rasmus Pechuel, Ingenious Knowledge, Germany; Manfred Huelsken-Giesler, Philosophisch-Theologische Hochschule Vallendar, Germany; Nadin Düthorn & Bernward Hoffmann, FH Münster, Germany

The effect on the scenario level on the eye-fixation time on the virtual problem student avatar in virtual classroom simulation ................................................................. 770
Jeeheon Ryu, Kukhyeon Kim & Chaeyeon Kim, Chonnam National University, Korea (South)

Video Games as a Literacy Tool: A Comparison of Players’ and Nonplayers’ Grades, Reading Test Scores, and Self-Perceived Digital Reading Ability ........................................ 777
Soonhwa Seok, Korea University, Korea (South); Boaventura DaCosta, Solers Research Group, United States

Facilitating Online Learning Success through Scaffolding, Mentoring, E-portfolios, and Personal Reflection. ................................................................. 782
Patricia Ainsa, University of Texas, El Paso, United States

Image Use in Higher Education Online Classrooms: A Survey of California Community College Online Instructors ................................................................. 787
Jason Bader, Mt San Jacinto College, United States

Not Your Mother's Professional Development: A Flexible Approach to Faculty PD ................................................................. 793
Diana Brandon, Charleston Southern University, United States
What do Teacher Educators think of Teacher Education Technology Competencies? ................................................................. 796
Jeffrey Carpenter, Elon University, United States; Joshua Rosenberg, University of Tennessee, United States; Tonia Dousay, University of Idaho, United States; Enilda Romero-Hall, University of Tampa, United States; Torrey Trust, University of Massachusetts Amherst, United States; Aaron Kessler, Massachusetts Institute of Technology, United States; Michael Phillips, Monash University, Australia; Scott Morrison, Elon University, United States; Christian Fischer, University of California Irvine, United States; Daniel Krutka, University of North Texas, United States

Usability and Usage of a Citizen Science App by Teachers and Students .................. 954
Richard Bex, University of Florida, United States; Lisa Lundgren, North Carolina State University, United States; Kent Crippen, University of Florida, United States
A System for Analyzing and Evaluating Computer-Assisted Second-Language Pronunciation-Teaching Websites and Mobile Apps ......................................................... 963
Lynn Henrichsen, Linguistics Department, Brigham Young University, United States

Developing a Unique Educational Experience for Children Museum using a Mobile Application ........................................................................................................ 969
Sevinj Iskandarova, Samy El-Tawab, Oris Griffin & Fariss Mousa, James Madison University, United States

Sustaining Mobile Learning in Autism Classroom Environments ........................................... 975
Pankaj Khazanchi, Liberty University/ Cobb county School District, United States; Rashmi Khazanchi, Mitchell County School System, United States

From Virtual to Real: An Expanded Systematic Review of Augmented Reality Learning ............................................................................................................................. 980
Mark Petrovich Jr., Mamta Shah & Aroutis Foster, Drexel University, School of Education, GLIDE Lab, United States

Inspiration by way of Pinterest: Tracking educators’ use of social media to locate and share classroom resources ......................................................................................... 990
Leanna Archambault & Annie Hale, Arizona State University, United States; Cathryn Shelton, California State University, Stanislaus, United States; Susie Puga, Arizona State University, United States

I Want My Money and I Want It Now! Automate Documenting Academic Activity for Federal Aid Using a Learning Management System ..................................................... 995
Sue Bauer & Susan Hicks, University of Central Florida, United States

Using Innovative Technologies to Increase Middle School Students’ Interest in Space Science ................................................................................................................................. 1002
Rhonda Christensen & Gerald Knezek, University of North Texas, United States; Troy Cline & Carolyn Ng, NASA Goddard Space Flight Center, United States

Technology Infused Learning with Digital Natives Promotes Principles for Good Practice ................................................................................................................................. 1008
Wendy Ford, Nina Sarkar & Christina Manzo, Queensborough Community College - City University of New York, United States

The Book: A Productivity Tool for the Modern Classroom ..................................................... 1015
Ingrid Fossbraaten, California State University, Long Beach, United States

Visualization of Social and Cognitive Presences for Collaborative Learning Facilitation ................................................................................................................................. 1020
Yoshiko Goda, Kumamoto University, Japan; Masanori Yamada, Kyushu University, Japan
Towards an Adaptive Learning Analytics Framework .......................................................... 1025
Yasemin Gulbahar & Denizer Yildirim, Ankara University, Turkey

Data Insight: Helping Districts Use the Right Data for Improving Student Outcomes ......................................................................................................................... 1033
Rich Huebner & Pamela Moore, Houghton Mifflin Harcourt, United States

Introducing Educational Psychophysiology ........................................................................ 1034
Richard Ingram, James Madison University, United States

Student Perceptions of Virtual Reality Technology for Computer Aided Design: A study to inform curriculum and add to the body of knowledge in an emerging field of technology in the learning environment. ................................................................. 1045
Donna Matteson, State University of New York at Oswego, United States

Analytics of Reading Patterns Based on Eye Movements in an e-Learning System .............................................................................................................................. 1054
Tsubasa Minematsu, Kaori Tamura, Atsushi Shinada, Shin'ichi Konomi & Rin-ichiro Taniguchi, Kyushu University, Japan

How the Use of iPad and Smartphones Creates Social Isolation ..................................... 1060
Niaz Makhdum Muhammad, Advancing Social Emotional Learning, United States; Mitch Schneider, The Chicago School of Professional Psychology, United States; Allison Hill & Douglas M. Yau, Advancing Social Emotional Learning, United States

The Negative Impacts of EdTech: EQ Perspectives .......................................................... 1066
Niaz Makhdum Muhammad, Advancing Social Emotional Learning, United States; Mitch Schneider, The Chicago School of Professional Psychology, United States; Allison Hill & Douglas M. Yau, Advancing Social Emotional Learning, United States

Implementation of an E-Health Observation System Employing Student Self-Checks .............................................................................................................................. 1072
Masahiro Nagai, Tokyo Metropolitan University, Japan; Noriyuki Matsunami, faculty of Education, Teikyo University, Japan; Hironori Kobayashi, Murasyo Elementary school, Japan; Yoshiya Morimoto, NDI Solutions, Japan; Masashi Yamada, Wiz Corporation, Japan

Learning Support System for Providing Page-wise Recommendation in e-Textbooks .............................................................................................................................. 1078
Keita Nakayama, Masanori Yamada, Atsushi Shimada, Tsubasa Minematsu & Rin-ichiro Taniguchi, Kyushu University, Japan
A Pilot Study of the Relationship Between Automatic Analytic Scoring and Speech Accuracy: Implications from Log Data on Speech-Training Courseware .......................... 1086
Yuichi Ono, Takeshi Kato, Shoma Aota & Naoki Takebayashi, University of Tsukuba, Japan; Yuki Toyono, CHIeru Co., Ltd., Japan

The Integrated Knowledge Map for Surveying Students’ Learning ......................... 1092
Akira Onoue, Masanori Yamada, Atsushi Shimada & Rin-ichiro Taniguchi, Kyushu University, Japan

Engaging Students through a Podcast Assignment in Canvas LMS ............................ 1101
Taeyeol Park, Georgetown University Medical Center, United States

Controlled use of multimedia items and other objects in computer-based second language assessment .......................................................... 1104
Cristina Perez-Guillot, Universitat Politecnica de Valencia Spain, Spain

Teachers Paying Teachers? A Guide for Teacher Educators Seeking to Understand Online Teacherpreneurship ......................................................... 1109
Catharyn Shelton, California State University, Stanislaus, United States; Leanna Archambault, Arizona State University, United States

Professional Development for Computer Science Education: Design and Outcomes from a Case Study Teacher .......................................................... 1115
Scott Sheridan, Chrystalla Mouza & Lori Pollock, University of Delaware, United States

A Smart Speaker Application to Assist Japanese Onomatopoeia Learning: A Prototype .......................................................... 1124
Takahiro Tagawa & Meng Jin, Kyushu University, Japan; Hitoshi Inoue, College of Healthcare Management, Japan

Recommending Highlights on Students’ E-Textbooks ................................................ 1128
Yuta Taniguchi, Atsushi Shimada, Masanori Yamada & Shin’ichi Konomi, Kyushu University, Japan

Teach Financial Education with an App ................................................................. 1135
Tyonia Wright, Department of Learning Technologies, University of North Texas, United States

Designing Learning Journals to Enhance Online Discussions among in-Service Teachers in a Graduate Course .......................................................... 1137
Qijie Cai, Minnesota State University, Mankato, United States

Suggested Methods of Effect Size Estimation for Research in Information Technology and Teacher Education .......................................................... 1143
Li-Ting Chen & Leping Liu, University of Nevada, Reno, United States
A Study of The Commercialization, Use, Adoption of EdTech In Public K-12 School ............................................................................................................................... 1153
Dowayne Davis, New Jersey City University, United States

Bridging the Gap between Computational Thinking and the Integration of ICT into Classroom Teaching and Learning: A Barrier to be Addressed ........................................ 1160
Takahisa Furuta, University of Gunma, Japan; Gerald Knezek, University of North Texas, United States; Rhonda Christensen, Institute for the Integration of Technology into Teaching and Learning, UNT, United States

Integrating digital media into schools: A Research to Practitioner Approach within Regional School Networks ............................................................................................. 1163
Lisa Gageik, University of Duisburg-Essen, Learning Lab, Germany, Germany

Study on “Familiarity” When Reading Using an Electronic Medium ...................... 1168
Kazuki Hosaka, Kamisu Municipal Kamisu First Junior High School, Japan; Takashi Usuzaka, Faculty of education, Ibaraki University, Japan

A Preliminary Analysis of the Teacher Educator Technology Competency Survey ............................................................................................................................... 1174
Gerald August Knezek, University of North Texas, United States; Rhonda Christensen, University of North Texas, United States

The use of Personal Construct Theory to Research the Benefits and Constraints of Technologies from the Participants’ Perspectives ...................................................... 1181
Terri L. Kurz & Robert Kleinsasser, Arizona State University, United States; Ivana Batarello Koki#, Faculty of Humanities and Social Sciences, University of Split, Croatia

Martine Pellerin, Jennifer Branch-Mueller & Robyn Timmons, University of Alberta, Canada

Interactive White Board Usage for Today and Tomorrow: A Snapshot from a Midwestern K-12 Teacher Preparation Program
Jessamay Pesek & Lisa Krall, Bemidji State University, United States

Self-Efficacy and Gender in Undergraduate Flipped Classroom
Arumugam Raman & Raamani Thannimalai, Universiti Utara Malaysia, Malaysia

Surfing the Open Oceans of Flipped Learning: A Comprehensive Student-Centred Model to Implement Flipped Classrooms
Jorge Reyna, University of Technology Sydney, Australia

Design of An Online STEM Teacher Training Environment: An Authentic Learning Perspective
Jiahui Ruan, Bian Wu & Xiaoqing Gu, East China Normal University, China

A Survey to Investigate Teachers’ Perspectives toward Technology Integration in Teaching in Delhi, India
Shilpa Sahay & Kara Dawson, University of Florida, United States

Effect of Different Instructor(s) on CAMPing
Emil Salib, Sevinj Iskandarova & Samy El-Tawab, James Madison University, United States

Steps towards developing a Digital Reading Workshop
Astrid Sølvberg & Marit Rismark, Norwegian University of Science and Technology, NTNU, Norway
A Conceptual Framework for Teaching Technology Integration: Insights from the Literature ................................................................. 2058
Liyan Song, Towson University, United States

Facilitating and Tracing Identity Change in Augmented Virtual Learning Environments ................................................................. 2062
Hamideh Talafian, Amanda Barany, Mark Petrovich Jr., Mamta Shah & Aroutis Foster, Drexel University School of Education, United States

Teacher Education, Experience, Training, and Course Factors in STEM Implementation: A Look at Engineering ........................................... 2070
Monica Trevathan & Jana Willis, University of Houston-Clear Lake, United States

Teachers' perceptions on what it means to be a teacher in the digital age .................................................................................. 2076
Dina Tsybulsky & Orit Avidov-Ungar, Achva Academic College, Israel

Evaluation Experiment of VR Display Media using a Smartphone for Art Appreciation Classes at Japanese Junior High Schools .................................................. 2085
Shoko Usui, Graduate School of Information Sciences, Tohoku University, Japan; Katsumi Sato, Graduate School of Education, Tohoku University, Japan; Tatsuya Horita, Graduate School of Information Sciences, Tohoku University, Japan

Technology Practices of Teacher Candidates during Field Experiences: What Are They Using and How Prepared Are They? .......................... 2091
Debbie VanOverbeke, Paulette Stefanick & Michelle Beach, Southwest Minnesota State University, United States

Effects of an online- and video-based learning environment on pre-service teachers’ self-efficacy beliefs, attitudes towards inclusion and knowledge of inclusive education during practical school experiences ........................................ 2099
Kira Elena Weber, Leuphana University Lüneburg, Germany; Christopher Neil Prilop & Marc Kleinknecht, Leuphana University Lüneburg, Germany

Using 3D Virtual Reality to Generate Awareness about Women Pop Art Artists ........................................................................ 2106
Monique Woodard, Drexel University, United States

Exploring the influences of immersive virtual reality pre-service teacher training simulations on teacher efficacy ........................ 2112
Heoncheol Yun, Chonnam National University, Korea (South); Sanghoon Park, University of South Florida, United States; Jeeheon Ryu, Chonnam National University, Korea (South)
Quality of Preservice Teachers’ Academic Feedback: Evidence from Instructional Videos ................................................................. 2117
Amani Zaier & Faith Maina, Texas Tech University, United States; Ismahan Arslan-Ari, University of South Carolina, United States

The Restaurant Game: a NEWTON PROJECT Serious Game for C Programming Courses ................................................................................................. 2121
Dan Zhao, Dublin City University, Ireland; Cristina Muntean, National College of Ireland, Ireland; Gabriel Muntean, Dublin City University, Ireland

Learning Productive Mathematical Talk Moves Through Mix-Reality Simulation: The case of Pre-service Elementary Teachers in a Hispanic Serving Institution. ........................................................................................................ 2129
Jair Aguilar & James Telese, The University of Texas Rio Grande Valley, United States

Mountains of Absolutely Terrifying Height (MATH) – Creating a Serious Games through Design-Based Research ................................................................. 2134
Marc Beutner, University of Paderborn, Germany; Rasmus Pechuel, Ingenious Knowledge, Germany

Mathematical Mediation: From Raw Experience to Spreadsheets via Data Tables. ........................................................................................................ 2141
Michael Connell, University of Houston-Downtown, United States

Exploring online professional development for enhancing elementary teachers’ mathematical skills and instructional effectiveness ................................................................. 2148
Anthony Dove, Brooke Blanks, Matthew Dunleavy & Thomas Bennett, Radford University, United States

The Depth and Breadth of Learning how to Trade Stocks through Simulated Play ........................................................................................................ 2152
Terri L. Kurz, Arizona State University, United States; Ivana Batarelo Koki#, Faculty of Humanities and Social Sciences, University of Split, Croatia; Višnja Novosel, Faculty of Humanities and Social Science, University of Zagreb, Croatia

Digital Math Games: Importance of Strategy and Perseverance on Elementary Children’s Learning Opportunities ........................................................................................................ 2157
Kristy Litster, Patricia Moyer-Packenham, Jill Ashby, Allison Roxburgh & Joseph Kozlowski, Utah State University, Mathematics Education and Leadership, United States

How the Balance of Gaming and Mathematics Elements Effects Student Learning in Digital Math Games ........................................................................................................ 2163
Kristy Litster & Patricia Moyer-Packenham, Utah State University, Mathematics Education and Leadership, United States
Creating Lesson Designing Map by Using a Concept Mapping Tool ........................................ 2173
Tadashi Misono, Shimane University, Japan; Yuki Watanabe, Tokyo University of Science, Japan

Preservice Teachers’ Content Knowledge and Technological Content Knowledge on Rational Functions ................................................................. 2177
Kyunghee Moon, University of West Georgia, United States

A Research-Based Argument in Favor of Low-Stakes Intermittent Testing in Math Classrooms .................................................................................................................. 2182
Caroline Morales, The Chicago School of Professional Psychology; STEAM Academy Lexington, United States; Aubrey Statti, Chicago School of Professional Psychology, United States

Math Snacks Early Algebra: Successes and Challenges of a Research Design for Computer-Based Games in Mathematics Classrooms ................................................................. 2185
Sara Morales, Karen Trujillo, Gaspard Mucundanyi & Ruth Torres Castillo, Math Snacks, New Mexico State University, United States

How Design Features Promote Children’s Awareness of Affordances in Digital Math Games .............................................................................................................................. 2192
Patricia Moyer-Packenham, M. Jill Ashby, Kristy Litster, Allison Roxburgh & Joseph S. Kozlowski, Utah State University, United States

Relationships between Mathematical Language, Representation Connections, and Learning Outcomes in Digital Games ........................................................................................................ 2201
Patricia Moyer-Packenham, Kristy Litster, Allison L. Roxburgh, Joseph S. Kozlowski & M. Jill Ashby, Utah State University, United States

An Attempt to Analyze Mathematical Question-solving Processes Using STACK ................................................................................................................................. 2210
Yasuyuki Nakamura, Nagoya University, Japan; Yuko Ichikawa, National Institute of Technology, Tokyo College, Japan; Yoshinori Miyazaki, Shizuoka University, Japan; Kentaro Yoshitomi, Osaka Prefecture University, Japan; Saburo Higuchi, Ryukoku University, Japan; Takahiro Nakahara, Sangensha, LLC., Japan

A Mixed Method Analysis of Student Achievement Dilemma: How Do Ethnicity and Socio-Economic Status Affect STEM Academy Students’ Achievement Levels in Algebra ................................................................................................................................. 2214
