# TABLE OF CONTENTS

An Interaction Effect between Gender and Scaffolding Strategy during an Intervention about how to Teach Young Learners to Think Computationally with a Floor Programmable Robot .......................... 1  
Charoula Angeli, University of Cyprus, Cyprus

Examining the Effects of Scaffolded Programming Activities with Robots on Pre-service Teachers’ Computational Thinking .............................................................. 7  
Charoula Angeli, University of Cyprus, Cyprus

An Accessible Computing Curriculum for Students with Autism Spectrum Disorders ................................................................. 17  
Abdu Arslanyilmaz, YSU, United States; Margaret Briley, Youngstown State University, United States; Mary Beth Loto, Potential Development, United States; Carolyn Fernberg, Potential Development Program, United States; Gabriel Beadle & Jeffrey Coldren, Youngstown State University, United States

Assisting K-12 Teachers to Make the Connection between Computational Thinking in Cybersecurity Unplugged Activities and Mathematical Mindset through A Cybersecurity Micro-credential .......................................................... 24  
Andrea Burrows, Mike Borowczak, Bekir Mugayitoglu, Caitlin Kennedy, Amanda Carson, Caitlin Person & Alexander Finch, University of Wyoming, United States

Developing Computational Thinking in Young Learners via Robotics: A Review of Literature ................................................................. 29  
Yu-Hui Ching & Yu-Chang Hsu, Boise State University, United States

Teacher Perspectives on a Narrative-Centered Learning Environment to Promote Computationally-Rich Science Learning through Digital Storytelling .......................... 35  
Jennifer Houchins, North Carolina State University, United States; Kimkinyona Cully, WestEd, United States; Danielle Cadieux Boulden, Kevin Oliver, Andy Smith, James Minogue & Bradford Mott, North Carolina State University, United States; Rasha Elsayed, Aleata Hubbard Cheuoua & Cathy Ringstaff, WestEd, United States

The Design and Implementation of Computational Thinking Assessment Based on Life Situation for Kindergarten ................................................................. 41  
Yunmeng Liu & Xiaohua Yu, Faculty of Education, East China Normal University, China, China

Are affective factors a good predictor of computational thinking? Examining the role of affective factors based on a conceptual model. .......................... 47  
Hyunchang Moon & Jongpil Cheon, Texas Tech University, United States
The Evaluation System and Case Study of Computational Thinking - oriented Programming Game .......................................................... 53
Meijiu Wu, Guanqun Liu, Qinghui Han & Jing Nie, East China Normal University, China

Supporting the Needs of Culturally Diverse Learners in Online Learning Environments ........................................................................................................ 60
Shernette Dunn, Florida Atlantic University, United States

Extending Compassion to Online Students ....................................................................................................................... 64
Michelle Bartlett & Carrol Warren, North Carolina State University, United States

Inclusive Instructional Technology Practices Implemented During COVID-19 to Reimagine Future Course Design ..................................................................................... 67
Michelle Bartlett, Carrol Warren & Jordan Dolfi, North Carolina State University, United States

HyFlex: From Brick to Click ...................................................................................................................................................................................... 75
Letitia Bergantz & Mark Gale, Athens State University, United States

Carl Rogers, Instructor Feedback, and Enhancing Teacher-Student Interactions Online ........................................................................................................................................................................................................ 81
Denise Bockmier-Sommers, Len Bogle, Brian Chen, Christie Magoulias, Jennifer Martin & Karen Swan, University of Illinois Springfield, United States

Design and Implementation of Online Fusion Reading for Adolescents with Limited Reading Proficiency ........................................................................................................................................................................ 91
Irma Brasseur-Hock & Ling Zhang, University of Kansas Center for Research on Learning, United States

Our Experience Piloting HyFlex with a Multi-Approach Option in a Teacher Education Program ........................................................................................................................................................................................................ 94
William Bratberg, Shannon Clapsaddle & Robin Smith, Southeast Missouri State University, United States

Students’ Self-regulated Learning in Synchronous Distance Education#A Control-value Perspective ........................................................................................................................................................................................................ 99
Xinyu Chang, Qihui Zhang & Bian Wu, East China Normal University, China

Teaching in the Moment: The Five Good Things .......................................................... 106
Nancy Chapko, Wisconsin Technical Colleges, United States

Re-thinking formative assessments and empowering self-regulated learners in an asynchronous online chemical engineering bridging course ........................................ 110
Ritushree Chatterjee & Monica Lamm, Iowa State University, United States
A Combination of Robust Course Design, Timely Feedback, and Flexibility for Dealing with Emergency Situations ............................................................... 120
Li-Ting Chen & Leping Liu, University of Nevada, Reno, United States

A Descriptive Study of Student Teachers’ Use of an Online Learning Readiness Self-Check System .................................................................................................................... 127
Jiaming Cheng & Jongpil Cheon, Center for Innovation in E-Learning (CIEL), College of Education, Texas Tech University, United States

“I’m Having the Quaran-time of My Life”: Modeling Emergency Remote Instruction to Teacher Candidates During the Covid-19 Crisis with a HyFlex - Multi Option Approach ............................................................................................................................ 133
Shannon Clapsaddle, Robin Smith & William Bratberg, Southeast Missouri State University, United States

The quick change in teaching and learning! ................................................................. 138
Michael Dal, University of Iceland, Iceland

Don’t Blame the Virus for the Need to Create a Sense of Belonging in an Online Learning Environment ........................................................................................................ 145
Debra De Pryck, University of Antwerp, Belgium; Yves Blieck, Vrije Universiteit Brussel, Belgium; Koen DePryck, LocalGlobal Institute, Belgium

Challenges Faced by Teachers through an Online International Project during the COVID-19 Pandemic: An Exploratory Study ................................................................. 151
Cristina Diordieva, Nanyang Technological University, Singapore

Impact of Contextualized Mobile Assisted Chinese Learning on Students’ Language Learning Motivation: Comprehensive Theoretical Framework ................................ 159
Orit Ezra & Anat Cohen, Tel Aviv University, Israel

Integrating Technology in Online Education to Foster Student Success ................. 165
Galia Fussell & Michelle Bianco, Purdue University Global, United States

Students’ Perceptions on the Various Delivery Methods of Instruction .................. 170
Joanne Hood, Lorraine Jacques, YuChun Chen & Dustin Hebert, Louisiana Tech University, United States

Videos or Zoom? Using a Flipped Classroom Approach to Facilitate PST Online Learning .................................................................................................................. 175
Amanda Hurlbut, Texas Woman’s University, United States
Enhancing Self-Regulated Learning Strategies for College Students Through Discussion Reflections in Online Learning Environment ............................................. 185
Mohamed Ibrahim & Rebecca Callaway, Arkansas Tech University, United States; Serhat Bahadır KERT & Mehmet Fatih Erkoç, Yıldız Technical University, Turkey

Flipgrid, Flipped Classroom, and Formative Assessment ............................................ 197
Lorraine Jacques, Louisiana Tech University, United States

Learning in a Pandemic: Teaching an in-Person Class Virtually; No, It’s Not an Online Course ................................................................................................................................ 203
Michael Jonas, University of New Hampshire at Manchester, United States

Multimedia in Learning and the Multigenerational Learner ......................................... 209
Caroline Kairu, University of North Texas, United States

Poster: Comparing Trends in Online Learning Research: A Categorical Approach Using Text Mining ........................................................................................................................ 217
Heather Keahey, Wharton County Junior College, United States

Case-Based Strategies for Learning Triple E Framework in Online Settings During the COVID-19 Crisis and Beyond ................................................................. 223
Cheun-Yeong Lee & Li-Wei Peng, Governors State University, United States

Lessons Learned from Online Course Delivery during the Onset of COVID-19 ..................................................................................................................................... 227
Michelle Morris, Billie Myers, Keicia Hawkins, Michael Moulton & Patrice Moulton, Northwestern State University of Louisiana, United States

The Community of Inquiry and Remote Teaching: The role of the Remote Educator ......................................................................................................................... 233
Nathaniel Ostasiewski, Athabasca University, Canada

A Study on Pre-Service Teachers’ Self-Efficacy and Satisfaction with Online Cooperative Inquiry Course during the COVID-19 Pandemic .............................................. 239
Yankun Qin & Hanbing Yan, East China Normal University, China

Incorporating Indigenous Voices in Learning Design: A Framework for Medical and Health Sciences Education .......................................................................................... 246
Jorge Reyna, The Australian and New Zealand College of Ophthalmologist (RANZCO), Australia
