A Low-Cost Approach to an Interactive Wall for the Tom P. Stafford Air and Space Museum

Abstract: Located in Weatherford, Oklahoma, birthplace of astronaut and flight pioneer General Thomas P. Stafford, the Stafford Air & Space Museum houses an amazing collection of air and space exhibits, an interactive aviation gallery that spans the history of flight, more than 20 historic aircraft, unique space flight artifacts. During this past year Southwestern Oklahoma designed and produced a poster that covered the sixties. From the Vietnam War, to the Civil Rights Movement, the race to the moon, and U.S. politics. The purpose of this display was to call attention to the 20 month period of the Gemini Space Program and to highlight its accomplishments in light of the turmoil of the sixties. This poster session is about the cost-effective means of creating an interactive wall to make the poster come alive.
