Roger Bruning, Center for Instructional Innovation, University of Nebraska-Lincoln, USA, rbruning@unl.edu

The Americans with Disabilities Act has made it necessary for universities to provide increased services to students with disabilities. The Accommodation Solutions Online website provides easily accessible information concerning accommodation solutions for various classroom environments, assistance to the faculty in providing Braille, raised line drawings, etc., provides expert advice on accommodations questions, and includes a searchable database on hardware/software solutions to accommodation challenges. In addition, the website provides campus maps that highlight accessible routes, restrooms and entrances and a resource guide to accessible restaurants, churches and other community resources.
