Designing and Implementing a Web-Based Course

Steve Chi-Yin Yuen, Ph.D.
Department of Technology Education
University of Southern Mississippi
E-mail: steve.yuen@usm.edu

Abstract: The Web has attracted teachers with promises of access, interactivity, ease of use, dissemination, and a potential universal presence in the lives of students and teachers. This presentation will describe experience learned in developing and delivering a Web-based course currently offered via the Internet with emphasis on what worked, worked well, caused problems, and failed miserably. The presenter will provide an overview and hands-on demonstration on his Web-based course at the University of Southern Mississippi [http://dragon.ep.usm.edu/~yuen/teaching/toe648/toe648.htm].
