PDAs: Learning in the Palm of Your Sweaty Little Hands

Carol Gilley, University of Arkansas, USA; Donetta Ginn, University of Memphis, USA

Abstract: Personal Digital Assistants are small, portable, and inexpensive. You can surf the Web and have e-mail capabilities. Software is available and titles are growing because of the ease of development. PDAs will soon become commonplace in the world as well as the world of education. Therefore it is important that educators and instructional developers look at PDAs and their operating systems as the newest medium of delivering instruction to the busy learners of the present as well as the future.
