Abstract for Best Practice Session:

Clicking LAMS: Participative Philosophy in both offline and online learning

Mohamad Ridwan Bin Othman
Senior Assistant Director
Learning and Courseware Development Section
Centre for Excellence in Learning and Teaching

Nanyang Technological University has long embarked on online and blended learning initiatives from more than 10 years ago. Two important learning tools used are the Clickers (Learner Response Systems) and LAMS (Learning Activity Management System).

The overarching philosophy that ties all these initiatives together is participative learning opportunities that we provide for students using affordances in these tools and making it a coherent whole.

In this session, the pedagogical underpinnings, the implementation process, key challenges and learning moments and our future vision will be shared.
