Web Trails with Webfire
Learn how to construct, traverse, and share instructional web trails that can be annotated and used to guide learners of all ages.

Constructing a trail
- Locating appropriate resources for a web trail
- Adding a trail mark to a web page
- Annotating a mark
- Tagging a trail
- Setting the visibility of a trail

Traversing a trail

Sharing

Instructional examples of trails

Participants will be shown techniques that the presenters have used with their own students: starting a new trail, adding and annotating marks, tagging a trail, and setting the visibility of a trail. In addition, participants will be shown and given instructional examples of trails.
