The Oklahoma State Department of Education and the No Child Left Behind program sponsor a program at Southwestern Oklahoma State University called Science Math Association of Rural Teachers. The program focus is to increase content knowledge, expand the information technology readiness, and the creation of standards based mathematics and science lessons for K-12 teachers in rural western Oklahoma. The primary function of the award is K-12 teacher training. The combination of University and PreK-12 teaching faculty connect current mathematics and science content and research with practical classroom applications and teaching standards. In this roundtable discussions will focus on assessments of partnership activities and provide a foundation for the standardization for assessment of Rural Math and Science Partnerships nationwide.
