Abstract: The broad and growing consumer adoption of portable devices such as mobile phones, PDAs, iPods, handheld computers and game consoles has turned business communication into a complex art. The need to be well informed and able to deliver solid results within minutes is becoming more critical for professionals every day. Future learning will depend on a foundation of effective connectivity, communications and collaboration for employees crunched for time. This session examines the next generation of eLearning technologies and offers an arrangement of 21st century communication skills needed to be an effective digital communicator in a connected world.

Interactive Outline - Attendees will learn:
- How to create eLearning applications on a range of mobile devices, including standard tools and formats used by businesses, governments and educational institutions for electronic, ad-hoc collaboration
- How to implement these tools in an everyday workplace, at any time.
- How to hold a global learning session on employee orientation, training and sales or professional development through web conferencing

Highlight Innovations in Learning: Peter Ryce will show real world examples of Innovations in Learning such as:
- Collaboration: How do you effectively communicate and collaborate while Web conferencing on your mobile phone or laptop?
- Communicating: How do you use creative expression across different mobile mediums?
- Confidentiality: Who has access to mobile documents?
- Authenticity: How do you know where the document came from?
- Creation: How do you create engaging eLearning apps with a software development kit?
