The North American Council for Online Learning (NACOL) reports that online learning in K-12 schools is a growing explosively and that by 2019, 50% of K-12 courses will be delivered online. This creates a new challenge for teacher educators to prepare candidates to deliver content via the web. This session will provide exemplary models for preparing teacher educators to incorporate and model the National Standards of Quality for Online Courses and National Standards for Quality Online Teaching. Ideas for using WEB 2.0 tools to model the standards and create engaging learning modules for online learning will be shared. Training models used to prepare teacher education faculty will also be shared.
