Coupling IP-videoconference with web-based learning environment

Timo Pärkkä, Univ. of Oulu, Finland; Markku Ojala, VIDERA, Finland; Arne Oehlsen, Charite, Germany; Ville Juutinen, Janne Himanka, Sonera, Finland

RUBIS Videoconferencing module adds high-quality interactive real-time audio and video communication possibilities to TELSIpro, a multilingual web-based learning environment. User interface is simple and integrated to other RUBIS modules, so that the user can make a connection to another user or multipoint conference by simply clicking a link in TELSIpro. Videoconferencing and other tools can be used simultaneously without extra effort on controlling the videoconference.
